NON-SEALED CHAINS

FEATURES

The last thing on your mind should be the reliability of the basic mechanics of your bike or ATV. These D.I.D Racing Chain standard non-O-ring chains were designed with quality in mind. These chains feature low-friction and long-wearing designs and are manufactured from a durable steel alloy. The chains will provide the extra strength you require to aggressively attack the trails or track. Plus, D.I.D Racing Chain standard non-O-ring chains come in different lengths and sizes to fulfill your requirements. Simply stated, these reliable D.I.D Racing Chain standard non-O-ring chains are the perfect combination of form, fit, and function.

SEALED CHAINS

FEATURES

D.I.D O-rings seals in lubrication, ensuring the chain's internal components are well-protected, extending the chain's lifespan. Having low maintenance thanks to the sealing properties, O-ring chains require less frequent lubrication compared to non-sealed chains. They feature weather performance in their design, that makes them resilient against water, mud, and other environmental factors, making them a solid choice for riders who frequently face unpredictable weather conditions.

CHAIN TOOL

The D.I.D KM500R chain tool is a 3-in-1 tool with the ability to cut your chain, press-fit the connecting link side plate, as well as rivet the pin heads.

The KM500R's unique design does not allow over-riveting and is a perfect fit for D.I.D ZJ (rivet) and FJ (press-fit-clip) styled connecting links. Replacement pins are available individually.

Fits 520, 525, and 530 sized chains only.

CONNECTING LINKS

D.I.D.®

OFFERS 3 TYPES OF CONNECTING LINKS
RJ, FJ, & ZJ.

RJ

Type links are what we call a loose-clip type link. The side plate may be pressed on and the clip will slide into the grooves very easily. This type is typically included with non-sealed chains.

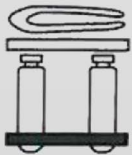

FJ

Type links are what we call press-fit-clip type links. These require a tool to more easily and evenly press on the side plate. The clip may be slid into the grooves easily. This type is typically included with sealed chain.

ZJ

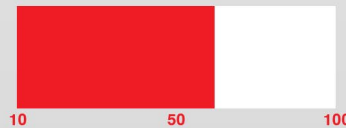

Type links are rivet-styled links in which the pin heads will have to be peened or riveted to secure the side plate in place. A tool is needed for this type to press on the side plate, as well as rivet the pin heads.

RJ

Safely Clip & Loose-Fit Type

Mainly for non-O-Ring Chain for small size motorcycles. You don't need any special tools.

FJ

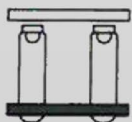

Safely Clip & Press-Fit Type

For O/X-Ring chain for middle size motorcycles. You need a tool to press-fit outer plate

ZJ

Rivet & Press-Fit Type

For O/X-Ring chain for large size motorcycles. You need a tool to press-fit outer plate & rivet pins
