BIG GUN EXHAUST SYSTEMS

The Big Gun EVO Street Series was designed to deliver maximum horsepower & torque gains throughout the RPM range. Made from .049 stainless steel tubing & an aluminum muffler canister, the EVO "S" exhaust system is much lighter than stock units. Our sleek muffler design allows for maximum clearance and ease of installation. The muffler is coated black and wrapped in our high temp EVO "S" decal, then coupled with our aggressive black end tip to give it that signature Big Gun look. All Big Gun exhausts are for closed course use only and are not intended for use on the road. Big Gun exhausts are NOT LEGAL for sale or use on pollution controlled vehicles in the state of California.

K&L AIR CUT OFF VALVE SETS

Here's an inexpensive alternative to the costly OEM assembly. To prevent "afterburn" generated by a lean fuel mixture when closing the throttle, the air cut-off valve temporarily closes the slow-jet air passage, creating an instantly richer mixture. Included in these high quality kits are all parts necessary for a complete rebuild (diaphragm, spring and o-ring). Made in Japan.

LEAN / RICH

The Jet Needle controls the fuel mixture in the mid-range 1/4-3/4 throttle position. The taper of the needle determines the amount of the fuel. For example: the thinner the diameter of the needle, the more fuel will be drawn. The thicker the diameter of the needle, the less fuel can be drawn.

K&N CRANKCASE VENT FILTERS

STEEL BASE CRANKCASE VENT FILTERS - ONE PIECE DESIGN FOR COMPETITION USE

Steel base crankcase vent filters have vent tubes added to their base. Filters consist of a one piece design with a rubber or chrome top. K&N PERFORMANCE OIL FILTERS

K&N powersports oil filters are 'TUV' product endorsed and 'TUV' factory production monitored. Our filters contain a modern synthetic filter media, designed for ultimate flow with less pressure drop, yet engineered for outstanding filtration. K&N powersports 'spin-on' oil filters feature a heavy-duty metal can. Most of these have a 17mm nut affixed onto the end that allows for easy installation and removal. HIFLOFILTRO®
PREMIUM FILTERS

WHY HIFLO?

Providing unbeatable performance and exceptional value, Hiflofiltro is the best-selling brand of aftermarket filters for motorcycles, scooters, and ATVs worldwide. The filters are also supplied to original equipment manufacturers as well as private label brands.

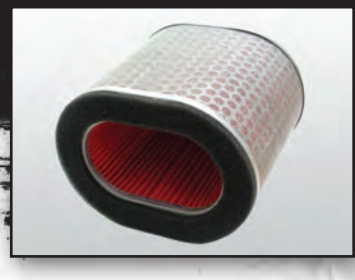
Materials

To achieve our quality aims and to ensure the consistency of our products, we use only premium materials from well known manufacturers: steel from Toyota Tsusho and NKK Japan, glue from Henkel Germany, filter paper from Ahlstrom Filtration Finland, Hollingsworth & Vose USA and Awa Paper Japan.

Production

The Hiflofiltro-Thai Yang Kitpaisan factory was founded in 1955 and has been manufacturing filters for the OEM motor industry since 1963. With the experience of more than four decades, continuous research and development and modern production facilities, we manufacture some of the best quality filters in the world.

Quality Control



Every oil filter goes through 16 individual quality control checks before it is ready to leave the factory. The whole manufacturing process, including the checking of raw materials, individual filter testing, is regularly audited and verified independently by TÜV SÜD.

Twin Air STREET BIKE AIR FILTERS

Twin Air Filter's design, high quality materials and superior construction deliver unbeatable performance and protection - and make Twin Air Filters the hands-down choice of more World & National Champions than all other filters combined.

1. Coarse open-pore foam catches airborne dirt, grime and sand.
2. Fine open-pore inner foam acts as a second filter to trap the smallest particles while ensuring maximum air passage.
3. Exclusively formulated adhesive ensures glue seams will not break down.
4. Thick, flat foam, greaseless sealing ring ensures maximum contact with your airbox, while acting as a breathable gasket for increased air passage.
5. Fused outer and inner elements prevent dirt and grime from being lodged between layers, unlike Twin Air, this can be a problem with inferior two-piece designs. Trapped particles can restrict airflow. And if dirt works it's way into your engine, a pinhead-sized granule will gouge your cylinder, piston and rings like a bullet.

Twin Air filters are designed to increase airflow while ensuring the highest level of protection from dirt/dust.

MOTION PRO OIL FILTER MAGNETS

- Easy to install, just attach to base of standard oil filter.
- Standard oil filters only trap particles down to 20 microns, leaving the most harmful 5 to 20 micron particles to circulate through your engine.
- This powerful six point magnet traps harmful, abrasive hard metal particles down to 1 micron that regular oil filters don't.
- No gimmick, these things really work to reduce wear, and significantly increase engine life
- Available in two sizes to fit most spin on or cartridge oil filters
- Makes any oil filter better than a high performance oil filter
- Reusable for up to 5 oil filter changes

Vesrah® RJL PREMIUM BRAKES

Vesrah now offers three different sintered metal brake pad compounds to serve a whole spectrum of riders and racers, depending on their needs: RJL, Super RJL and Super RJL XX.

VESRAH RJL BRAKE PADS

RJL Brake Pads, the original go-to brake pads for the club racer. Developed specifically for high-performance work, Vesrah RJL pads offer a good initial bite with a flat friction coefficient which makes them very predictable when you grab the brakes.

VESRAH SUPER RJL BRAKE PADS

Super RJL brake pads deliver a very strong initial bite, more than RJL pads - with an even higher friction coefficient which makes them very responsive to lever modulation. If you want the strongest initial bite and lots of braking power, this is the pad for you.

VESRAH SUPER RJL XX

Super RJL XX brake pads are the latest offering from Vesrah. These pads provide even more power than the Super RJLs, but without the big initial bite. They're ultra responsive too where miniscule changes in pressure at the lever will be felt. If you demand ultimate stopping power, choose Vesrah Super RJL XX pads.

NOTE: All brake pads are sold in a set for one disc or drum. Order one set for each disc or drum on your motorcycle.

SINTERED METAL PADS

- An excellent, economical choice for replacing OEM sintered metal brake pads
- Pad consists of 50-60 percent copper combined with carbon, ceramic, tin and abrasives
- Iron backing plate is plated with copper to make it a stronger bond with the pad friction material
- Powerful stopping power in wet or dry conditions
- Excellent initial brake pad bite, lower lever effort and minimal pad bed-in time required
- Can be used with stainless steel rotors
- Pad material is aramid fiber, metals, abrasives and lubricants mixed with Phenol Resin
- Metal powder components exceed 50 percent of pad material
- Excellent pad life
- Good feel at the lever
- No bedding-in is required
- Hard brake pad backing plate will not warp, even under extreme use
- Superior stopping power with no fade
- Excellent initial brake pad bite that is not as aggressive as the RJL compound
- Slightly more progressive feel at the lever

CERAMIC SEMI-METALLIC PADS

- Many fibers, natural and man-made have been researched and combinations of several fibers like Aramid fiber, Ceramic fiber, Carbon fiber and Metal (copper and brass powder) fiber etc.
- Soft–mild braking control, controllable pad on first braking with safety
- Good initial bite
- HH stopping power pad (Ameca test result)
- Low disc attack
- Long life pad

BRAKE SHOES
