MEGA SLICE

Gotta love AIRHEAD MEGA SLICE's Cool Camo graphics! MEGA SLICE is one of the top selling 4 rider towables of all time for good reason, it's simply a better deck tube. We invented the tapered gusset design in 2000; thicker in front, thinner in back. The tapered gusset provides better towing characteristics, a more comfortable riding position and easy mounting from the water. Peak performance is guaranteed with MEGA SLICE's topside neoprene panel, 8 nylon-wrapped handles and neoprene knuckle guards. The durable 100" (deflated) 30-gauge virgin PVC bladder is fully encased by a rugged 840 denier double-stitched nylon cover with reinforced internal tow harness. MEGA SLICE is equipped with a super-convenient Kwik-Connect for easy hook-ups and a Speed Safety Valve for fast inflating and deflating. Designed for 1 to 4 riders.

JUSTA TUBE

JUSTA TUBE is not really just a tube! Sure it's a black donut, but it's a hypoallergenic black donut, much less likely to cause an allergic reaction than that old truck tube you used to use! The Schrader valve stem is shorter than a standard auto valve and has a tapered cap, so there's no discomfort or scratching legs. It's made of isobutylene isoprene synthetic rubber, an upgrade from a standard tire tube. It's more resistant to heat, abrasion, ozone and sunlight. JUSTA TUBE provides year round fun and is easy to store! It's a durable snow tube in winter. In summer, you'll enjoy it as a durable river, lake, pool or ocean float.

KAYAK PADDLE

AIRHEAD's 86 inch kayak paddle breaks down into 4 sections for compact storage. The blades are asymmetrical to equalize the force on both sides of the blade when paddling, which in turn results in less twisting of the paddle. The high impact plastic blades are lightweight and reinforced with fiberglass for added durability. Blade angles are adjustable with a simple release of the spring loaded pin and a twist of the lightweight anodized aluminum shaft.

AIRHEAD ROPES

SAFETY REFLECTIVE ROPES

Everyone agrees that dawn and dusk are the best times for watersports on a lake. You get a chance to go play on some "glass"! The downside is that the lighting is not ideal. With that in mind, AIRHEAD is proud to introduce a series of new tube tow ropes with a strand of reflective material running the full length of the rope that makes these ropes come alive, even in low light. The rope also has an EVA foam core so that it floats higher, keeping the rope away from your prop! The high visibility electric color scheme enhances their visibility mid-day too.

SAFETY TUBE ROPES

You'll love pulling tubes with these tow ropes! AIRHEAD Safety Tube Ropes' vibrant colors are extremely easy to spot. An EVA foam core is installed inside the 16 strand braided rope for enhanced flotation, which will help keep it out of your prop! A reflective material strand runs the full length to increase visibility in low light conditions. Great for those dawn and dusk low light watersports excursions! These Safety Tube Ropes are 60 feet long with a loop at each end. They are UV resistant and allow minimal stretch. These ropes meet or exceed all WSIA standards.

BLING TUBE ROPES

These ropes will give you swagger! AIRHEAD's BLING Series ropes add another dimension to towing, as they sparkle in the sun and glow in twilight! The extravagant look compliments the luxury of high end boats, adds a little class to lesser boats and makes you look like a watersports pro! BLING series ropes are one of a kind, shiny and reflective material is braided together with top quality polypropylene. These tube tow ropes are 60 ft. long with a loop at each end. A "totally blinged-out" rope keeper is included.

TOW HARNESS - 1 RIDER

If your boat isn't equipped with a pylon or ski eye and you enjoy watersports activities, you need a tow harness. It creates a tow attachment point at the center of your boat, behind your outboard or stern drive. This tow harness is perfect for pulling a skier, wake boarder, knee boarder or 1 rider tubes. Simply clip it onto your boat with the hooks provided, and attach your ski or tube rope. A 6" float keeps the attachment loop floating on top, away from your propeller. 12 feet long to fit larger boats and pontoons. Yellow / Red.

SELF CENTERING TOW HARNESS

We combined the popular self-centering feature of our top selling rope tow harness with a durable cable. Heavy duty 5,000 lb. hooks connect the tow harness to your boat. The extra long 14 ft. cable fits most larger boats. As the stainless steel pulley glides along the cable, it keeps the tow point centered for the optimum pull at all times. Tow rope hook-ups are easy with the heavy duty Kwik-Connect. Designed for water skiing, wakeboarding, kneeboarding and 1 or 2 rider towables. 3,000 lb. tensile strength.

AIR PUMPS

AIR PUMP

This 120 volt canister style air pump inflates and deflates towables, pools, air mattresses and beach toys. The accordion-style hose locks onto the pump and valve fittings, eliminating annoying disconnections. Three universal valve fittings fit all popular valves. For added convenience, there's a carry handle and a 10 ft. long power cord. Volume is 300 liters/minute, maximum pressure is .92 psi. It draws 1.6 amps / 170 watts.

HI-PRESSURE AIR PUMP

Enjoy the performance of this 120 volt air pump. It inflates and deflates quickly and effectively. Peak pressure is 2.5 psi, plenty of pressure to get high end inflatable boats, rafts and reinforced backyard items nice and firm. A Pressure Release Valve is included to limit pressure to 1.4 psi for preventing over-inflating towables, pool toys and other vinyl and nylon covered inflatable items. The accordion-style hose locks onto the pump, eliminating annoying disconnections. Four universal valve fittings fit all popular valves and lock onto the hose. Includes a screw-on Boston Valve adapter, an AIRHEAD exclusive. Carry handle and a 10 ft. long power cord. Draws 6.1 amps / 730 watts. Volume is 460 liters/minute.

SUPER PUMP

This is the best performing 120 volt air pump available, inflating and deflating at unprecedented speed. Peak pressure is nearly 3.0 psi, plenty of pressure to get boats, dinghys, rafts and reinforced backyard items nice and firm. Four universal adapters are provided to fit all valves commonly used on boats, kayaks, towables and other inflatables. The adapters lock onto the 36 inch long heavy duty reinforced hose. A Pressure Release Valve is included to limit pressure to 1.4 psi for preventing over-inflating towables, pool toys and other vinyl and nylon covered inflatable items. The accordion-style hose locks onto the pump, eliminating annoying disconnections. You'll love the convenience of the screw-on Boston Valve adapter, an AIRHEAD exclusive. For added convenience, there's a carry handle and a 10 ft. long power cord. It draws 7.1 amps / 917 watts. Volume is 480 liters/minute.

BELLOWS ACTION FOOT PUMP

Use your foot to inflate or deflate towables, boats and other inflatables with AIRHEAD's HI-Volume Bellows Action Foot Pump. This durable air pump has a 54" long hose and 3 adapters to fit many valves including Boston and stem. The air displacement per stroke is 0.5 liters. Since the pump achieves a maximum air pressure of 2.9 psi, you can get your inflatable boats and towables nice and firm. It conveniently collapses to fit under kayak decks or boat seats, so it's a good choice for "topping off" large towables in your boat.

DOUBLE ACTION HAND PUMP

This double action pump inflates and deflates towables, kayaks, boats, airbeds, and other inflatables. It delivers a continuous stream of air on both the up and down strokes. Simply turn the release valve counter-clockwise and you're pumping air only on the down-stroke. This is a great option when your inflatable is almost full and there's back pressure. Four universal valve fittings are included to fit Boston valves and stem valves. The accordion-style hose stretches to 5 ft. long and interlocks to the pump, so that it doesn't fall off while you're pumping. Volume is 2 liters / stroke. Very effective for "topping off" large towables in the boat, since peak pressure is an impressive 14 psi.

12 VOLT HIGH PRESSURE PUMP

AIRHEAD's 12 Volt Hi Pressure Air Pump w/ Pressure Release Valve produces 3 times the pressure of other 12 volt air pumps. Therefore it does a great job getting towables, boats and rafts nice and firm for peak performance. Five universal valve fittings fit all popular valves and lock onto the hose. A removable pressure release valve limits the output to 1.4 psi, the perfect inflation pressure for towables. The 21" hose is heavy duty and reinforced with PVC coils. This powerful pump draws too many amps to plug into a cigarette lighter style outlet. Hook it up to your car, truck or boat battery with the alligator clips connected to a 10 foot power cord. Volume is 410 liters/min. Maximum pressure is 2.5 PSI It draws 28 amps / 340 watts.

MULTI-VALVE

AIRHEAD MULTI-VALVE consists of 2 Boston valves with different thread patterns on the bottom and a Shrader valve with cap. One of the Boston valves is sure to fit the thread pattern of your inflatable, no matter what brand. The Boston Valves have a square base, which is much easier to turn than a round base, especially with wet hands. Use the Shrader valve to inflate your inflatables at a gas station or with an air compressor. Alternatively, screw off the Shrader valve and inflate the Boston valve with an AIRHEAD air pump. All components are bright red and green, so they're easy to find.

COMPRESSOR ADAPTER

The Compressor Adapter allows you to inflate or top off your tube using a standard bicycle tire pump or air compressor. The Compresser Adapter only fits on the screw-on type valves like the 'boston' valve (aka 'speed valve') or multi-valve. The Compressor Adapter is not for use on push-in style valves like the Speed Safety valve, over-sized safety valve, or safety valve. Consult your product user manual to see what kind of valve your product uses.

BOAT KILL SWITCH KEYS WITH LANYARD

Be Prepared, Always Carry a Spare! If you lose or break your kill switch key, for whatever reason, you won't be able to start your engine. Most marinas don't stock replacement keys, so your much-deserved day out on the boat will be ruined. This lanyard has 7 keys to fit all BRP, Johnson, Evinrude, Mercury, Yamaha, Honda, Tohatsu, Nissan and Suzuki kill switches. It's equipped with a swivel snap hook to prevent tangles, and rust-free stainless steel crimps. Don't leave the dock without it!

PERFORMANCE LANYARDS

Atlantis has created the "Performance" lanyard from the suggestions and feedback from Pro Racers, Freestylers, and Freeriders. This lanyard features the float tube at the rear point of the lanyard next to the vest clip. This location modification still provides the lanyard assembly with flotation yet keeps the area around the key almost weightless and free of any extra objects that may come in contact with water during aggressive riding which sometimes causes the key to pull out unwillingly.

REPLACEMENT FLOATING LANYARDS

Atlantis has created this product as a direct replacement for any make and model's lanyard. This product is ideal for any and all OEM lanyards that have lost their rubberized coating exposing the inner string which removes the convenient coil effect of their original state. This problem is most common with OEM "DESS" and all normal lanyards. This product can easily be used by utilizing the convenient stainless clip to attach the desired lanyard key to and have a "like new" floating lanyard in seconds. The replacement lanyard has a stainless clip to secure any desired lanyard piece, an attached flotation tube, and plastic vest clip.

ELLIPSE MIRROR W/HIGH STRENGTH COMPOSITE BRACKET

CIPA's Ellipse Marine Mirror is a 4 x 11 inch multi-lens universal boating mirror. It features one 3.25 x 6 inch convex stationary lens in the center and two adjustable 2.5 x 2.5 inch flat lenses on each side and attaches to the windshield using a quick and easy clamp-on design and can be positioned to sit above or below the windshield frame. It's great for boats with walkthrough windshields because it allows you to position the outer lenses so that you can avoid mounting the mirror to the center of the windshield. A ball and socket tension knob keeps the mirror where you position it. The universal quick-mount, anti-scratch bracket will mount to rectangular or rounded windshield frames from 15/32" to 1-3/16". The attached mounting bracket is made from aluminum and has a black textured finish. The Ellipse Marine Mirror is constructed of heavy-duty durability tested materials and features OE grade glass. First surface coating provides a high quality image that eliminates symptoms such as ghosting and multiple reflections. OE standards ensure high quality and a crisp clear view. It is the most advanced family recreational boat mirror available allowing a view of both sides of the boat as well as behind. Perfect for boats without wakeboard towers.

RISK RACING PALM PROTECTORS

Blisters can make holding onto your handlebars a painful and sometimes dangerous experience due to loss of grip. Knowing the debilitating effects of blisters, it was the goal of Risk Racing engineers to develop a solution that offered full coverage protection to the areas of the hand which are affected by intense friction, rubbing, heat and moisture.

- Ultimate protection against blisters
- Full coverage palm protection
- Grip flange protection between thumb and forefinger
- Ultra-Thin armor worn underneath gloves
- Vibration reduction

If high power is top priority in a replacement battery, look to Yuasa's High Performance Maintenance Free batteries. Yuasa means more power, less maintenance and longer life. Yuasa's High Performance Maintenance Free batteries are your best choice for motorcycles, utility vehicles, scooters, ATVs, riding mowers, personal watercraft and snowmobiles.

ALL OF THE FEATURES OF A STANDARD MAINTENANCE FREE ***PLUS***
Increased Power – Up to 30% more cranking amps thanks to a radial grid design and additional plates.

Selected types also available in Factory Activated (filled, sealed and charged at the factory).

YUASA BATTERY

YTZ MAINTENANCE FREE

A range of high performance, compact and lightweight batteries designed to provide maximum power from minimum space. Designed to meet the increasing demands of today's high performance machines the Yuasa YTZ range are the only powersports battery in the world to incorporate expanded plate technology. Smaller, lighter and more volume efficient, Yuasa YTZ batteries provide greater starting power from minimum space. Factory sealed and activated they are completely spill proof enabling multi-angle fitment, never require topping off and are maintenance free for the life of the battery.

- Up to 80% more starting power per Kg
- Maximum power – minimum space
- Reduced self discharge for longer life
- Superior vibration resistance

YUASA BATTERY

MAINTENANCE FREE

YUASA BATTERIES CONTINUED

Absorbed Glass Mat (AGM) Technology is an advanced battery design used in Yuasa's Maintenance Free Batteries that eliminates water loss. Once it's filled with acid the battery is permanently sealed - so you'll never need to fill it with water or check the acid level.

Long Life

Because of its lead calcium design, the AGM battery will hold its specific gravity more than three times longer than conventional lead antimony types. This means much longer periods between charges when the battery is used in a standby mode, like winter storage.
And to remain factory-fresh the AGM battery is shipped dry along with its own pack of high-gravity acid that's added at the time of installation.

Sealed, Non-spillable

Once filled with acid from its special packs, the AGM battery is virtually maintenance free. It's totally sealed and all of the acid is absorbed in the special plates and separators, so there is no need to worry about acid leaks on valuable vehicle parts and accessories.

Selected types also available in Factory Activated

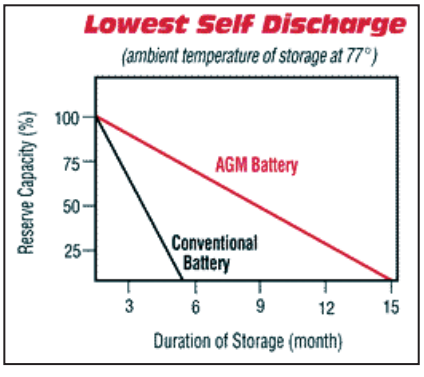

(filled, sealed and charged at the factory).

YUMICRON CX

YUASA BATTERIES CONTINUED

The YuMicron CX was the first small engine starting battery to use "lead calcium" technology. This special technology means the YuMicron CX generates more power, requires less maintenance, and lasts longer than any other conventional battery.

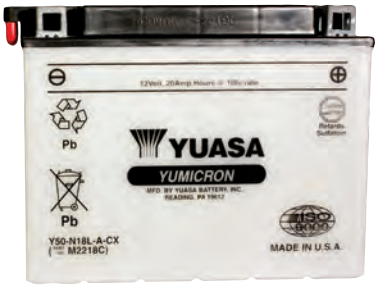

More Power
Because of it's unique design, the CX will generate 5% to 8% more cold cranking amperage than our own high-output YuMicron lead-antimony battery. For high compression machines, this means greater reserve capacity and more starting power.

Less Maintenance
The YuMicron CX lead calcium technology also reduces water loss, so the CX requires servicing (water filling) only about one-eighth as often as ordinary lead-antimony types.

Longer Life
The YuMicron CX holds it's specific gravity more than three times as long as lead-antimony type batteries resulting in a longer shelf life. This feature means longer periods between charges, especially during winter months.

~ IMPORTANT ~
Yuasa Yumicron/Yumicron CX Batteries are shipped dry with no acid. To order acid for your battery first check the acid volume needed on the Battery Specification Chart then order part #899099 for a 22.1 oz. bottle and part #899100 for a 33.99 oz. bottle.

CONVENTIONAL

A workhorse battery engineered to protect against corrosion, withstand vibration and deliver high cranking power.

The industry standard for motorcycles and riding mowers, our Conventional Battery is anything but conventional. This workhorse is for applications requiring operation on uneven surfaces and vibrating environments - even when the weather's dealing its worst. It's the rugged, reliable and dependable battery that customers are looking for!

These features are built into our conventional manifold vented battery - and every battery in the YUASA line:

- Patented separators provide high cranking power
- Through-partition construction delivers maximum power
- Unique sealed posts resist corrosion for longer battery life
- Polypropylene cover and container thwart damage from gas, oil, and impact
- Heat-sealed, bonded unit fabrication protects against seepage and corrosion

TYTANEUM BATTERIES

Tough. Reliable. Whether you ride daily, seasonally, or just on weekends, you'll get more enjoyment out of your motorcycle, ATV, PWC or snowmobile with a TYTANEUM battery. Our batteries perform reliably during off-road, over water and cold weather use, and keep their charge even after months of storage. Available in traditional flooded or the new sealed AGH designs, TYTANEUM batteries are built to withstand punishing vibration, salt spray, gas and oil, and protect against equipment-damaging spills, corrosion and seepage. And because nothing ruins a weekend faster than a dead battery, we use advanced designs and manufacturing techniques to shorten current paths and reduce resistance, giving you higher cranking power and maximum battery life.

MAINTENANCE FREE HIGH PERFORMANCE

SEALED MAINTENANCE FREE

Once these batteries are put into service, they become a completely sealed unit requiring a lot less maintenance than Conventional Batteries. Although the battery still needs to be charged on a regular basis if your vehicle is not in use, there is no need to monitor the fluid level in this battery type. Unlike the Conventional Battery, once this type battery is sealed, it becomes spill proof, which can eliminate damage from battery acid that can occur from using a flooded battery.

FACTORY ACTIVATED MAINTENANCE FREE

The same convenience and technology as the Sealed Maintenance Free Batteries mentioned above, except this battery is sealed and activated at the time of manufacture. Very convenient to the point that all that needs to be done is put the battery into your vehicle and you are ready to ride. The only downside of this type of battery is that all batteries once activated have a shelf life, and if this battery is not going to be used right away, or be put in a vehicle that is not going to ridden on a regular basis, the battery will need to be kept charged on a battery maintainer.

CONVENTIONAL

This type of batteries has flooded electrolyte and is very accessible. These batteries have to be carefully and periodically maintained. The conventional batteries are normally less expensive than the other types mentioned, but with the cost savings come more maintenance. You will need to add distilled water from time to time to prevent the battery from sulfating. Water loss is a normal characteristic of this type of battery because of the high temperature inside, and the process of electrolysis and evaporation. This means the fluid level of the battery needs to be checked on a regular basis. Conventional batteries also tend to discharge more rapidly than AGM type batteries.

INSANE PERFORMANCE. LITHIUM POWERSPORT BATTERY.™

2X MORE POWER. **10X** MORE STARTS. **5X** LONGER LIFE.

DYNAMIC BMS.
Equipped with an auto-enabled, advanced battery management system that provides maximum protection, performance and bi-directional cell equalization for long lasting stability. No BMS reset needed.

ACTIVE PROTECTION.
Protects engine against over-charge, extreme heat, short circuit, over discharge, extreme cold and over-current.

SHOCK ABSORPTION.
Designed with A custom rubber dampening base and foam insert to extend the life of the battery and keep connections secure.

FIT MORE APPLICATIONS THAN EVER BEFORE WITH

ADJUSTABLE SIZING • REMOVABLE MOUNTING BLOCK • MODULAR SPACERS

A removable mounting block allows the battery to fit more applications. The threaded insert enables direct-mounting for additional simplicity and security.

Modular mounting spacers can be stacked and attached to the NLP batteries to alter the BCI size enabling the battery to be safely and securely mounted.

NOCO 250A Lithium Powersport Battery

Introducing the all-new NOCO Lithium NLP5 12V Lithium Powersport Battery, a Group 5 battery, rated at 2Ah (25Wh) and 250-amps of starting power. It's better than lead-acid motorcycle batteries in almost every way: no sulfation, no activation, no acid, no maintenance, no water needed, and it comes fully charged and ready to install.

- Delivers over 250-amps of starting power, over 50,000 starts, and over 2,000 charge cycles, blowing away its lead-acid rivals. Simply put, it's 2X more power, 10X more starts, and 5X longer life.
- An advanced battery management system that provides maximum safety protection with bi-directional active cell balancing for long-lasting reliability. Plus, no BMS reset is needed.
- Unleash the power of lithium and quickly recharge within minutes. Utilizing the most advanced rapid-charge technology, it provides enough starting power with just 5-minutes of charge.
- A multi-terminal configuration that allows front, side, top, and female installations. Plus, modular trays fit various group sizes and a removable mounting block to accommodate legacy battery applications.
- Compatible with most powersport brands, including Aprilla, BMW, Buell, Ducati, Harley-Davidson, Indian, Triumph, KTM, Argo, Can-Am, Honda, Husqvarna, Kawaski, Suzuki, Arctic Cat, BRP, Waverunner, Polaris, Vespa, and more

NOCO 700A Lithium Powersport Battery

Introducing the all-new NOCO Lithium NLP30 12V Lithium Powersport Battery, a Group 30 battery, rated at 8Ah (99Wh) and 700-amps of starting power. It's better than lead-acid motorcycle batteries in almost every way: no sulfation, no activation, no acid, no maintenance, no water needed, and it comes fully charged and ready to install.

- Delivers over 700-amps of starting power, over 50,000 starts, and over 2,000 charge cycles, blowing away its lead-acid rivals. Simply put, it's 2X more power, 10X more starts, and 5X longer life.
- An advanced battery management system that provides maximum safety protection with bi-directional active cell balancing for long-lasting reliability. Plus, no BMS reset is needed.
- Unleash the power of lithium and quickly recharge within minutes. Utilizing the most advanced rapid-charge technology, it provides enough starting power with just 5-minutes of charge.
- A multi-terminal configuration that allows front, side, top, and female installations. Plus, modular trays fit various group sizes and a removable mounting block to accommodate legacy battery applications.
- Compatible with most powersport brands, including Aprilla, BMW, Buell, Ducati, Harley-Davidson, Indian, Triumph, KTM, Argo, Can-Am, Honda, Husqvarna, Kawaski, Suzuki, Arctic Cat, BRP, Waverunner, Polaris, Vespa, and more.

BATTERY CLAMPS

Exclusively designed & engineered for BOOST MAX™

- Boost MAX™ Battery Clamps feature a heavy-duty clamp designed for both 12-volt and 24-volt gas and diesel engines in Class 8+/CE high-displacement vehicles and equipment.
- Heavy Duty Design: Our no-melt and smoke-free clamps are reinforced with all metal versus generic clamps all plastic construction.
- Made from durable, high-performance 2AWG silicone wire that maintains its flexibility in cold weather environments.
- The Boost Max™ camlock cable connectors will not slip or disconnect from the GB500 when the cables are pulled.
- HD Battery Clamps feature a heavy-duty clamp design for automotive, marine, RV and truck applications.
- Heavy Duty Design: Our no-melt and smoke-free clamps are reinforced with all metal versus generic clamps all plastic construction
- Made from durable, high performance 8AWG silicone wire that maintains its flexibility in cold weather environments.
- Compatible Models : 650464, 650465, 651100

1-Amp Fully-Automatic Smart Charger, 6V and 12V Battery Charger, Battery Maintainer, Trickle Charger, and Battery Desulfator with Temperature Compensation

- Similar to our G750, just better - It's 35% smaller & delivers over 25% more power and it's simpler and easier to use than ever before - plug-in, connect to the battery, select a charge mode, & start charging your battery
- Enjoy precision charging - An integrated thermal sensor detects the ambient temperature and alters the charge to eliminate over-charging in hot climates and under-charging in cold climates
- Charge dead batteries - Charges batteries as low as 1-volt. Or use the all-new force mode that allows you to take control and manually begin charging dead batteries down to zero volts
- Beyond maintenance - It's not just a trickle charger, it's an advanced battery maintainer. A fully-automatic, worry-free battery charger for everyday use - 24/7 - with zero overcharge
- Compatible with all types of vehicles - charge and maintain cars, motorcycles, lawn mowers, ATVs, lawn tractors, trucks, SUVs, boats, PWCs, classic cars, and more.

Battery Tender LOW POWER BATTERY CHARGERS // 0.75A - 5A

BATTERY TENDER® JUNIOR 12V @ 0.75A

The Battery Tender® Junior is much more than a trickle charger. It has a brain. It's lightweight, compact, and fully automatic; very easy to use, especially in small spaces. It will keep your battery fully charged so that it is ready to go when you are!

- Perfect for all lead-acid, flooded or sealed maintenance free batteries (AGM and gel cell).
- Complete 4-step charging program (Initialization, Bulk Charge, Absorption Mode, Float Mode).
- Automatically switches to float / maintenance voltage after fully charging the battery.
- If the battery voltage drops too far under load, full charger output power resumes.
- Solid state two color LED indicates stage of charger.
- Spark proof.
- Reverse polarity protected.
- 12' output cord.
- 5 year warranty

WATERPROOF 800 INTERNATIONAL

This compact 800 mA battery charger has all the charge characteristics of its cousin the Battery Tender® Junior. It incorporates highly efficient surface mount technology electronic components. The interior is completely encapsulated, protected from shock, vibration, and moisture by an electrically insulating, thermally conductive, flame retardant, synthetic epoxy resin compound. It's tough, affordable, and a strong, innovative battery charging solution. This charger is no larger than a standard computer mouse yet packs 800 millamps of pure constant current charging power. Coupled with a brain (IC chip), the charger will constantly monitor, charge, and then maintain your battery --- even while totally submersed under water! Perfect for all outdoor types of ATV's, watercraft, motorcycles, boats, or anywhere water is a threat. International universal input voltage works anywhere in the world 100-240 AC Volts 50/60 Hz.

- 3 LED indicators to show the battery condition: weak, normal or strong
- 3 LED indicators to check the status of the alternator voltage: low, normal or high
- Works on any 12 volt system, compact design for easy storage
- Compact size, a handy item for your glove box so you know right away if the problem you have is related to the battery or alternator

Performance Tool

POCKET MULTI-TESTER

- Tests AC and DC circuits
- Volt and ohm analyzer
- Includes batteries and instructions

W2979	14.95

Performance Tool

DIGITAL MULTI TESTER

- Features AC and DC volt measurement, DC current measurement, resistance measurement, diode test and Ohms
- LCD, on/off switch and two 32” test leads
- Low battery and over range indicators
- Automatic zero adjust
- 9V battery included

UNIVERSAL BATTERY CABLE APPLICATION

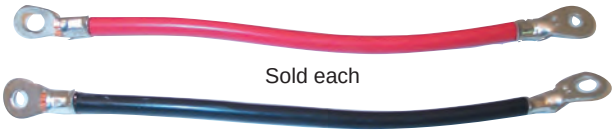

- Increase starter performance by supplying maximum battery current to the starter motor
- 4-gauge cable manufactured with pure electrolytic-grade, 36-gauge tinned copper strands for maximum current transfer and flexibility
- Specially rated 125 degrees C, oil-and-gas-resistant, ultra-flexible translucent jacket guarantees excellent performance
- All cables manufactured with 1-1/4” terminal and 1-5/16” terminal

NOTE 1:

This stator backing plate has a small adjustment range for fine tuning ignition timing. Install stator in the center of the adjustment range to match the timing mark on the OEM backing plate. The motor will run fine in this position. Ignition timing can be adjusted from this location for optimal performance per the factory service manual instructions.

Battery condition is extremely important. No stator can work correctly with a bad or weak battery. Always fully charge your battery before performing any charging system tests or replacing parts. If there is any doubt, have the battery load tested or replaced.

NOTE 1:

This voltage regulator is ONLY for lithium batteries THIS IS NOT FOR LEAD ACID BATTERIES. Output Voltage is the key factor in a voltage regulator designed specifically for Lithium batteries. The ideal charging voltage for Lithium batteries is 13.9-14.2VDC. The RMSTATOR regulator has a carefully set output voltage of 14.1VDC (+/- 0.1VDC). This stable and ideal output voltage carefully keeps a lithium battery in it's ideal charging range.

Please contact the manufacturer of your Lithium Ion Battery to ensure our product has the correct set point for their product

Battery condition is important. No regulator can make up for a bad or weak battery. If in doubt charge your battery and have it load tested, or simply replace it. ALWAYS START WITH A FULLY CHARGED BATTERY!

NOTE 2:

Battery condition is extremely important. No voltage regulator can work correctly with a bad or weak battery. Always fully charge your battery before performing any charging system tests or replacing parts. If there is any doubt, have the battery load tested or replaced

WATER TEMPERATURE SENSOR

NEW

223423

Water temperature sensors work with the vehicles computer system to measure/monitor engine temperatures including oil/coolant. If these sensors fail, a warning light will usually show up on the machine, this could lead to overheating or improper running conditions if not replaced.

RECTIFIERS/REGULATORS • STATORS

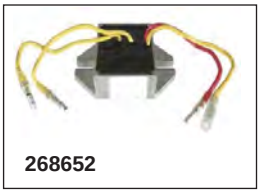

All of Rick's rectifier regulators are brand new parts and come with a one year replacement warranty. Most units are direct replacement pieces and come with the factory plug ends. This allows for an easy install – just unplug your part and plug ours in. We also know there is a need for universal rectifier regulators for certain unique machines. In this case, the rectifier regulator will come with wire leads only and you will need to hard wire it. Before replacing your rectifier regulator, be sure to read the instructions & check the integrity of all your electrical connectors.

* Universal Style replacement rectifier/regulator with wire leads only, no end connectors or plug ends. Generic instructions included.
NOTE: Before replacing a 268275 or 268569, be sure to check OHMs reading on the rotor. A reading of 3.5-4.5 OHMs is required. Without sufficient resistance, failure will result and warranty will be void.

Wavewerx MARINE & PWC COMPONENTS

WAVEWERX DRIVE SHAFTS

- The drive shaft is a mechanical component that transfers power from the crankshaft to the impeller
- The shafts are typically threaded on the one end and splined on the other
- These threads and splines carry all the torque of the motor and can degrade from friction and fatigue

FORGED POWERSPORTS PISTONS

Powersports Forged Piston Advantage

Wiseco leads the performance aftermarket by producing the highest quality forged pistons for Dirt Bikes, ATV's, Snowmobiles, Outboard Marine, and Motorcycles right here in the USA. Wiseco is unique because we forge all of our own pistons in house, and produce all of our own forge tooling right here in the USA. This allows us to control all aspects of our manufacturing process from raw bar to skirt coating finished parts.

In addition, in-house dyno testing gives Wiseco the ability to develop state-of-the-art technology such as new shapes, coatings, and components, and lead the industry through rigorous R&D. Linking all segments of Wiseco's organization through design, testing, manufacturing, and distribution allows us to fulfill market needs with minimum lead-times.

Extreme racing conditions demand the strength and toughness that only forged pistons can offer. Compared to cast pistons, forgings are tougher and more durable, and will stand up to the abuse that high performance motorsport applications require. Most castings are brittle, have no grain structure and tend to fail catastrophically when the material yield strength is exceeded. Forgings have condensed grain that is aligned to the features of the part, which produces higher mechanical properties, and resistance to impact and fatigue. Each forging is designed to optimize the strength-to-weight ratio, and maximize performance.

Wiseco ArmorGlide™

Piston Engineering / ArmorGlide Coating

Wiseco's detailed skirt shapes and profiles are very specific to each application. Variable cam programming software developed in house allows Wiseco to produce high-performance shapes unique to only Wiseco. The skirt shape (barrel/cam) is one of the most functional areas on the piston, and provides stability and smooth operation in the cylinder bore. Stability is important for proper ring seal, reduced friction, and quiet operation. Each skirt shape is designed for a specific running clearance, based on coefficient of thermal expansion of the piston alloy. Some forging alloys expand more than casting alloys, but each Wiseco piston is designed with the proper installed clearance to produce the most power, least wear, and best seal at running temperature, for each application. Comparing installed clearances on cast vs forged parts is not indicative of the running clearance at temperature. Wiseco engineers have a strong background in all forms of racing applications, and produce the best shapes and designs in the industry.

Some of our forged pistons offer our new ArmorGlide™ skirt coating, which is the result of testing, development, and benchmarking through Wiseco's rigorous in-house dyno program. The outcome is the ultimate in skirt coating toughness, lubrication, and bond technology working together to minimize friction, maximize horsepower, and provide improved wear resistance. Not only is ArmorGlide™ a high-tech lubricant that reduces friction, but it also allows the piston to be fitted tighter within the bore allowing a better ring seal and reduced noise from piston rock.

Top End Piston Kits

Wiseco's complete top end Piston Kits are offered for nearly every popular application in the powersports market. These kits contain everything you need to complete your rebuild the right way, the first time. High quality parts specifically chosen by us to match our forged pistons are included in this kit for easy one stop shopping.

- 2-stroke kits feature our Pro-Lite™ pistons that are CNC machined for optimal cam shape and profile for peak HP and service life.
- 4-stroke kits feature a 'race-ready' dome finish with smooth edges for improved combustion flow. Horizontal slot-pin oiling reduces friction and provides scuff resistance, along with a pressure seal groove for maximum ring seal.
- Most PK/SK/WK/VT kits from Wiseco feature a complete top end gasket kit that gives you everything you need to complete your rebuild from premium materials.
- 4-stroke race applications feature Wiseco's ArmorGlide™ skirt coating to provide reduced friction and noise to contribute to increased horsepower.
- Dedicated forgings used for superior strength to weight ratio utilizing aerospace alloy.
- High Performance ring kit and alloy pin included with each piston kit for extended life and sustained power.

PISTONS WITH AN ATTITUDE.

NAMURA® TECHNOLOGIES INC

NAMURA PWC LINE

AS THE HEART AND SOUL OF NAMURA TECHNOLOGIES, NAMURA PISTON KITS ARE DESIGNED AND PRODUCED WITH TODAYS MOST ADVANCED TECHNOLOGIES AND RIGOROUS PROTOCOLS.

Namura offers direct replacements pistons for MX/ ATV/ PWC original equipment as well as hi-compression, and a variety of oversizes to meet your ride's needs. They are available in 0.25mm increments, from the -1 (0.25mm) through the -8 (2mm) oversize. We also carry B (0.01mm) and C (0.02mm) oversizes which help extend the life of your expensive coated cylinders. There is a selection of big bore piston kits available for some applications.

ALL NAMURA PISTONS KITS COME STANDARD WITH:

MACHINED SMOOTH HEADS+

Reflects combustion heat and reduces carbon buildup, protecting the top of the piston. Some tests have shown this feature can increase horsepower and fuel economy by up to 6%.

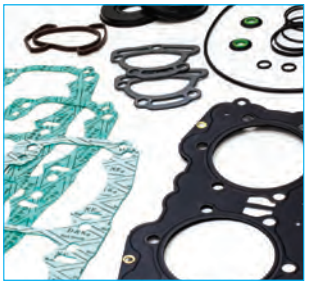

MOS2 (TEFLON/MOLYBDENUM)+ COATED SKIRTS

A rolled-on application process provides a bond that is 10 times stronger than other spray on coatings. Benefits include increased heat transfer, reduced friction, and helping to eliminate cold seizures.

ANODIZED DOMES+

Increases heat resistance and durability; pistons with anodized domes are 75% stronger than non-anodized pistons.

PERSONAL WATERCRAFT PISTON AND RING SETS

PROX PISTONS are precision machined on the latest, state of the art CNC equipment. The same low-expansion, low-friction piston alloy is used as is used for all major Japanese engine manufacturers. ProX Piston Kits are a first class solution to replace the original piston in your Motorcycle, Scooter, Moped, ATV, Personal Watercraft, etc.

Coated for ultimate performance • Most of the ProX pistons come with a coating. We have developed a new skirt coating that not only assists the wear in process, but also helps reducing friction after the wear in. The black coating is made from a delicate mix of materials and will increase performance.

PROX PISTON RINGS are made by OEM factories to exact specifications. ProX uses well known brands like Rikken Japan, TP and NPR to be sure you will get the quality you might expect from our brand. All ProX piston rings can be used in cast iron bores, nickel ceramic platings (Nikasil), boron composite and electrofusion bores.

PERSONAL WATERCRAFT ORIGINAL & PLATINUM SERIES PISTON KITS

Cast piston. Original Series piston made to exact OEM specifications. Can be used along with original factory piston meaning you can just replace one piston if you wish. Complete kits include all pistons, rings, clips, wrist pins, gasket kit & top end bearings. Individual kits include one piston, rings, clips and wrist pin.

Available in Original Series and Platinum Series kits. Original Series pistons are made to exact OEM specifications. Platinum Series pistons are made of high strength hardened aluminum designed to prevent skirt and ring groove breakage. Piston walls are treated with a nonabrasive coating which reduces heat and friction for extended life.

CONNECTING RODS

Vesrah Connecting Rods are made of specialty steel for excellent mechanical strength under high temperature.

Highly technical carbonization process is also applied to render the Vesrah Connecting Rods with additional strength at stress points

Bearing housing surface of Vesrah Connecting Rods are smoother than Ice. The surfaces are precision machined and irregularities are only measurable by microscope.
This smoothness gives you full piston with minimum friction energy loss.

THE ORIGINAL HOT RODS™ CRANKS AND RODS

CONNECTING RODS

Connecting rod kit sold complete with rod, crank pin, crank pin bearing, top end bearing, and thrust washers (where applicable). Rebuilds Hot Rods and OEM crankshafts. Made in the U.S.A.! One single connecting rod is where it all began for Hot Rods and, now, with over a decade of experience, continuously improved designs and an ever expanding line of applications; Hot Rods has continued to be, not only "The Original" aftermarket replacement rod, but the best aftermarket replacement rod. All of our rods are created from 8620 case hardened steel. But, in addition to that, our rods also undergo a process of double forging which helps to improve grain flow as well as dimensional consistency — and that means a rod of uncompromising strength. To improve fatigue durability, all of our rods are also shot peened. This process, utilizing a stainless steel shot, helps to remove stress risers and creates more smoothly blended radiuses. And, in the end, a Hot Rods connecting rod is one of the most durable rods that enthusiasts and engine builders can buy. However, a rod is only as good as its supporting parts and that's why a Hot Rods kit features only the most advanced and durable bearings, crank pins and thrust washers. Case hardened, silver coated, flat profile KU bearings are used throughout our entire line and high-quality, long shouldered KZ bearings are used in our two-stroke wrist pin bearing applications. In short, our bearings are just as tough and reliable as our rods. Even our crank pins are subjected to the same rigorous standards as our rods and bearings. Each Hot Rods crank pin is created from hot-rolled ASTM 4115 steel and case-hardened to a level of 58–62 Rc.

HOT RODS CRANKSHAFTS

Complete OEM replacement crankshaft assembly. Factory trued and balanced. Ready to install. Building on the success of high-quality, OEM replacement rods, Hot Rods introduced the perfect place to showcase them — in a Hot Rods OEM replacement crankshaft. Since that time, Hot Rods crankshafts have been regarded as the premier alternative to costly manufacturer cranks. But, in addition to being a cost effective alternative, Hot Rods crankshafts also bring a level of uncompromising quality, design and innovation not seen in its competitors. One such innovation would be the Hot Rods line of drop-in stroker crankshafts. Not only do these stroker cranks bring about a heightened level of performance, but do so without costly case machining, custom cam chains and spacer plates. Better yet, many Hot Rods stroker cranks even utilize the engine's stock piston.

MAIN BEARING & SEAL KIT

Replacement crankshaft main bearing and seal kit. A quality alternative to expensive OEM bearings and seals. To compliment Hot Rods full line of heavy duty OEM replacement and stroker crankshafts are Hot Rods complete main bearing and seal kits for both two and four-stroke applications. Like other Hot Rods products, these main bearing and seal kits are built to the highest quality standards that meet or exceed those of OEM.

Additionally, not only will Hot Rods main bearing and seal kits work in rebuilding a Hot Rods crankshaft; but, they also work in rebuilding OEM cranks as well.

COMETIC

PWC TOP END ENGINE GASKETS

- Everything you need to swap out those old gaskets for new replacements -- head, base, reed, intake, manifold and exhaust gaskets (where applicable) Does not include oil seals.
- State-of-the-art graphite head gaskets are made of non-asbestos flexible graphite, laminated to a stainless steel core
- Graphite material extracts heat away from the combustion area, eliminating hot spots
- Cometic graphite material is impervious to fuels, coolant and oil
- Maximum seal and flexibility are obtained with excellent torque retention
- Cometic gaskets provide years of service with proper installation

STANDARD UNIVERSAL BACKFLUSH KIT SINGLE NO VALVE

- This product is in popular demand for those who typically run their watercraft in shallow surf and sediment rich waters
- Back Flushing pushes the sand down and out through the pump utilizing the flow of water and gravity
- Connects to your stock water squirter on the side of your ski, much easier than using other flush kits and adaptors
- Ftis all Kawasaki /Yamaha /Polaris /Tigershark /Honda models with water squirter
- Works with both rubber & aluminum water squirters

983127	**20.00**

FLUSH KIT SEADOO SPARK

- A must to help keep your engine corrosion free and to maximize performance
- Kit includes all necessary components for a hassle-free flush.
- Much easier than the OEM flush kit to install, No drilling, only need a slotted screw driver for installation
- The Atlantis flush kit comes with a longer hose which makes flushing your machine much easier (less fighting to get your hand between the pump and hull to connect it like the OEM kit)

K&N STOCK FLAME ARRESTORS

The **K&N Flame Arrestor** makes the best air-filtration technology available for marine engine use. Marine application owners can experience the increased horsepower and engine protection provided by K&N's oiled cotton gauze and epoxied screen filter element. For high performance on the water, K&N Flame Arrestors will help you fly.

PERFORMANCE FILTERS

K&N RACE FLAME ARRESTORS

K&N "Racing Only" Flame Arrestors use an epoxied screen as a filter. They do not have cotton media and are intended for race use only. For non-racing use of your personal watercraft use regular K&N flame arrestors which come with K&N's oiled cotton media sandwiched between screen material. For high performance on the water, K&N Flame Arrestors will help you fly.

PERFORMANCE FILTERS

604403 604407

K&N MARINE CARBURETOR ADAPTERS

K&N Marine Carburetor Adapters make connecting K&N flame arrestors to personal watercraft carburetors quick and easy. Add performance by replacing your restrictive factory airbox with a K&N flame arrestor and adapter.

visu-filter®

A BETTER FUEL FILTER FOR ALL GAS-POWERED ENGINES

- Protects engine from harmful contaminants
- No leak, high impact nylon construction
- Functions as a reservoir for trapping water
- Cleaner burning engine, less emission and less smoke
- Better throttle response; improvement in engine performance
- Some increase in power and fuel efficiency

What is Visu-filter®?

A highly reliable fuel filter system so unique that Visu-filter® signals the need for replacement in motorcycles, lawn tractors, snowmobiles, jet skis, roto tillers, air compressors, and more! The strong, high-impact nylon housing is extremely transparent for immediate viewing. Many styles and sizes available. Wide selections of filter media such as polymer-treated paper with automotive specifications, stainless steel screens and polyester screens.

SALT OFF Protector Kit with PTEF 32 oz. w/Applicator	6	94000	**904696**	**49.69**

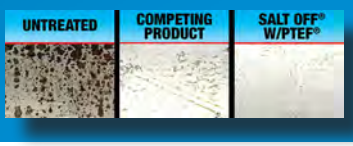

Salt Off® Concentrate is specifically formulated to quickly and effectively remove salt deposits from metal, fiberglass, plastic or painted surfaces. It contains special polymers that bond to the treated surface to help prevent the formation of future deposits. Depending on the application, Salt Off® can be sprayed directly onto the surface to be treated and then rinsed with fresh water, or simply left in place.

The formula is safe for use on all boats, vehicles, trailers, marine parts, engines, fishing and dive gear and more. It will not etch, stain or otherwise damage metal or plastic surfaces. It is ideal for removing salt water deposits from boats and fishing gear, as well as for protecting cars or trailers from the damage caused by exposure to road salt.

Salt Off® is also very effective at protecting marine engines used in salt water; when used with the Salt Off® Applicator, it will flush deposits from the engine's cooling system to help insure maximum performance and service life. The Applicator can also be used to more easily apply Salt Off® to large areas.

Salt Off®is available in convenient, Ready to Use, 22 ounce spray bottles as well as in concentrated form, in 32 ounce and 1-gallon containers.

ULTIMATE

ULTIMATE XTREME CLEAN

- New gallon size for easy refill of 22 fl. oz. spray container
- Removes even the toughest dirt and greasy stains, even on tough-to-clean porous surfaces
- Special chelating agents break the bond that holds dirt or stains to surface without heavy scrubbing
- Cleans fiberglass, vinyl, plastic, metal and even inflatable boats
- Phosphate-free, safe for use on or near the water; runoff won't harm sealife or cause algae blooms

DESCRIPTION	QTY/CS	MFG #	PART #	
ULTIMATE Xtreme Clean Gallon	4	83200	**904688**	**65.90 ea**
ULTIMATE Xtreme Clean 22 oz. bottle	6	83222	**904689**	**15.69 ea**

Star brite's ULTIMATE XTREME CLEAN is formulated with the latest technology ingredients to be the toughest crud-buster ever. The special chelating agents attack road grime, bug bits, bird deposits, greasy smears and more, breaking the bond that holds them to the surface so they can be wiped away without heavy scrubbing.

However, unlike most all-surface cleaners that use cheap, harsh ingredients, Xtreme Clean does not contain caustic, dangerous chemicals that can damage the finish. Xtreme Clean is safe for use on all metal, fiberglass, plastic, chrome, stainless, wrapped, leather and rubber surfaces.

ULTIMATE BIKE GUARD

S100 TOTAL CYCLE CLEANER

If you've been using a bucket of car suds or a quick detailer, chances are you been missing the most important and threatened places on your bike…those hidden nooks and crannies where dirt can hide. Why isn't that ok? Dirt traps moisture and the moisture can't dry out. The result is corrosion, rust and tarnish and you can't even see it happening! S100 Total Cycle Cleaner works differently by creeping to find the hidden soils you can't see, then penetrating and loosening them so a sharp stream of water can remove them. The result is a bike that is clean everywhere, not just where can see. Simply put, it's better for your bike. (You don't have to tell your friends it's quick too.)

S100 SHINE-ENHANCING CLEANSER AND S100 CARNAUBA PASTE WAX

Ready to get the ultimate shine? Experts agree that waxes with cleaners in them are compromise products, that the cleansing and waxing steps must be done separately, so that's what we've done. Use our two step S100 Cleanser and S100 Paste Wax system, we can virtually guarantee you can put your bike in a show! Get your bike clean and dry, then begin with our S100 Shine-enhancing Cleanser. Professional painters and detailers agree that proper surface preparation is fundamental to getting the ultimate shine. The S100 Cleanser gently removes water spots, small swirl marks and imbedded road film to set up the surface for the ultimate shine, all without scratching even sensitive clear coats! Now you're ready for the ultimate wax job with our S100 Carnauba Paste Wax. Free of abrasives and cleaners and made with a unique blend of carnauba (the world's hardest wax) and beeswax, you will be amazed at the depth of shine and darkening of dark colored surfaces. And we've eliminated two common annoyances, powdering during rubout and white stain residues on plastics and rubber! And it's so easy to apply and remove, some bikers tell us it's as easy to use as a liquid!

S100 DRYING TOWEL

There's not much point in getting a bike washed quickly, if you can't get it dried quickly. That's why we introduced the amazing S100 Drying Towel. More drying power than a natural chamois, yet it never gets stiff so it's always ready to use. Lint free, it stores in its own plastic pouch so it's ready to pull out of the saddlebag. Made from 100% biodegradable materials without using CFC's or formaldehydes.

S100 DETAIL + WAX

OK, we know there are some times when your bike isn't really that filthy, maybe just a bit dusty, rain-spotted or covered with bugs. We've got something for that, too. S100 Detail + Wax removes that dust, those spots, and the bug residue. And its unique carnauba and beeswax ingredients replace them with a "gangbusters" shine. Just think of it as a wash and wax in one! It's easy to use, too. Just spray a bit on a soft cloth or onto the bike's surface and rub to a high gloss. Pack a can in the saddlebag and you're ready for a dusty road or that surprise rain shower. No wonder an independent test rated S100 Detail + Wax "... the most consistent performer of all".

S100 DETAILING SET & S100 DETAILING SWABS

If you're fussy about caring for your bike, it's important not to skip the details! The S100 Detailing Set enables you to get into those tough to reach nooks and crannies. The 25 USP grade swabs are so flexible they can be bent 90° to reach around corners. Use them to apply other S100 products such as S100 Total Cycle Cleaner or S100 Corrosion Protectant, too. The S100 Detailing Set also includes an ultra-soft polishing cloth for dusting, rubbing out polishes, waxes, etc. Refill the Detailing Set with the 50 piece Detailing Swabs pack.

S100 WHEEL CLEANER

Sometimes those road wheels need some extra cleaning power to get them back to that "like new" look. And, worse yet, that brake dust (it contains metallic particles!) can become corrosive if allowed to stand for awhile. If you find that brake dust build up is hard to keep up with, we recommend you try our S100 Special Performance Gel Wheel Cleaner. It provides up to 50% more cleaning power than our Total Cycle Cleaner thanks to the clinging power of its unique gel formulation. Spray on and allow to stand (you control the amount of cleaning you need, see directions on bottle), then rinse thoroughly. Neither acid, nor lye-based like cheaper products, S100 Wheel Cleaner provides complete surface safety for any type of wheel or wheel finish, including those tricky anodized finishes.

DESCRIPTION	QTY/CS	PART #	
500 ml	12	**650291**	**11.49**

S100 CORROSION PROTECTANT

No matter how clean you keep your bike, you always have to be on the lookout for that dreaded "enemy number one", corrosion. Unless you live in the desert, humidity, salt air, spring road salt and plain old pollution threaten your bike's "precious metals". That's why we developed S100 Corrosion Protectant. Just spray on a clean, dry bike (or into a cloth) and rub into the areas you want to protect, those sensitive areas like fork tubes, case covers and wheels (and don't forget those hidden areas you can't reach.). You'll find that S100 Corrosion Protectant won't rub off easily in the rain and so its protection really lasts. It even dramatically out-performed a famous so called "corrosion fighter", so this is really the way to protect your investment!

Important note: This is the perfect product for winter lay up and long term storage. Spray directly on all sensitive areas and allow to dry.

S100 FINISH RESTORER AND S100 POLISHING SOAP

For small areas, our S100 Finish Restorer is the perfect solution. It can renew tarnished metals (aluminum, stainless, chrome etc.) to a brilliant shine, even often take small scratches out of plastics. It rubs out easier than ordinary polishes and doesn't come with that ugly ammonia smell, either! No wonder Motorcyclist Magazine called it "the nearest article to a miracle finish maintenance product…"

S100 ENGINE BRIGHTENER

Got a bike with a black engine that just isn't so black anymore? Bikers like you told us they needed special help in this area and we listened! Our S100 Engine Brightener can take a tired, greyed-out engine and make it look almost factory-new again! Just clean the engine and dry, then spray on our temperature stable S100 Engine Brightener. Use the handy misting spray nozzle (an industry exclusive) to get into the cooling fins and crannies without over-applying. That factory black look comes back and lasts for miles and miles and holds up to a bunch of washes, too. Friends will think you replaced the engine!

S100 SPECIAL SURFACES CLEANER

Dirty, dull plastics ruin the look of a bike. New S100 Special Surfaces Cleaner is a waterless spray-on, wipe off cleaner that cleans up fairings, helmets, visors, instruments and windshields in seconds. Bugs, rain spots and road film disappear instantly leaving nothing but a nice clear surface! Here's what some bikers said: "…used on my helmet visor…it appears so clear it seemed like I didn't have my visor down". "I was amazed how it gave back life to the cover on the speed and tach gauges." Safe for use on polycarbonate and acrylics such as Lexan®, Lucite®, Plexiglas®, fiberglass, etc. Perfect to take along in the saddlebag.

530MX

530MX is a 100% Tri-Ester based synthetic oil. Developed on the world's toughest race circuits, 530MX produces more horsepower, increased torque and excellent clutch feel – there is no better choice for modern MX/ Offroad motorcycles. Advanced additives ensure the ultimate in protection for critical engine, transmission and clutch components. High temperature detergents keep your engine running clean and trouble-free, while the ultra shear-stable polymer system maintains constant viscosity – minimizing viscosity loss and clutch fade.

K100 G+

Gasoline Fuel Treatment w/Enhanced Stabilizer for 2 & 4 Cycle Engines

K100-G+ eliminates water in the fuel to prevent winter freeze-ups and phase separation in E-10, and improves fuel performance by altering the burn chemistry for more complete combustion, boosting the octane, and reducing oil fumes and toxic emissions. K100-G+ cleans engines and fuel systems, dissolving gums and varnishes for maximum engine performance and fuel system life. K100's unique organic chemistry will even "fix" equipment that has been sitting a while and won't start – or runs roughly!

FUEL TREATMENT

Run Cleaner, Run Stronger, Run Longer

K100 Fuel Treatments are proprietary formulations of complex engineered organic compounds developed to eliminate water in fuels, remove gums and varnishes and stabilize fuel, add lubricity and corrosion protection and boost cetane/octane ratings. Its ALL- IN ONE Chemistry is all you will need to keep your engines running right.

Prevents phase separation in ethanol blended gasoline. Eliminates water and water related problems. Stabilizes fuel for up to two years, and keeps it fresh. Replaces lost lubricity in LSD, ULSD and K-1 winter blends. Reduces black smoke, unburned hydrocarbons, CO and particulate emissions. Cleans engines and fuel systems for better mileage, easier starts, smoother idle, more power and better acceleration. Reduces maintenance costs and down time and extends engine life. Increases octane/cetane ratings 1 ½ to 2 points.

K100 D+

Diesel Fuel Treatment

K100-D+ eliminates water in the fuel to prevent winter freeze-ups, and improves fuel performance by altering the burn chemistry for more complete combustion, boosting the cetane and reducing black smoke, pollutants and emissions. K100-D+ cleans engines and fuel systems while adding lubricity for maximum engine performance and fuel system life. K100's unique organic chemistry will even "fix" equipment that has been sitting a while and won't start – or runs roughly!

303 ALL SURFACE INTERIOR CLEANER

Use only on clean surfaces. Out of direct sun, spray surface with 303® Automotive Protectant and WIPE COMPLETELY DRY with a clean, dry microfiber towel. Can also be applied directly onto microfiber applicator or towel before using. If streaking occurs, too much product has been used. Use a wet towel to remove excess, IMMEDIATELY wipe completely dry.

Great for use on a variety of surfaces such as: vinyl, plastics, synthetic & natural rubber, leather, PVC, gel coat & fiberglass. Ideal for use on your dashboard, other vinyl/leather interior surfaces of your car, tires, windshield wiper blades and more! Not for use on unfinished leathers (such as suede), fabrics (canvas), floorings, clear plastics, gauge panels, or headlights.

Note: this product does not air dry. Extra buffing with a dry cloth INCREASES bonding, repellency & longevity. Apply every 3-5 weeks for maximum UV protection.

- Leaves a dry, matte finish & no oily or greasy feel
- Helps repel dust, lint and staining
- Provides superior UV protection for any rubber, vinyl, and plastic surfaces of your vehicle
- Keeps surfaces looking newer, and lasting longer
- Brightens surfaces and prevents cracking and fading

LP MINI BIKE RACING COOLANT & ANTIFREEZE

Liquid Performance Minibike Racing Coolant with LP3 is specially formulated for smaller race engines, specifically 50cc to 85cc motorcycles. The benefits of the LP3 additive reduces heat, friction and internal engine wear in the closed loop cooling system. This helps to maintain horsepower while extending engine life. Its lower viscosity results in better coolant flow meaning less work for the smaller high revving engines and their water pumps. Liquid Performance Mini Bike Racing Coolant with LP3 is legal for all AMA sanctioned racing events. Pre-mixed with deionized water so it is ready to use. Propylene glycol based, phosphate free, virtually non-toxic and biodegradable. Sold per bottle.

- Forms an “Active” ultra thin, clear film that kills existing corrosion cells, and will protect your quad or bike against new corrosion forming and last for
- 12 months
- “ACTIVE’” which means that it ‘creeps’ and ‘keeps on working’ DOESN’T NEED REAPPLYING AFTER EVERY WASH!
- Contains no water, silicon, teflon or wax - no sticky build up, no risk of existing corrosion being sealed in and no risk of water remaining where it will cause corrosion and damage, even on electronics
- Chemically neutralizes road salt
- A clean, clear ultra thin fluid
- Dries out moisture
- Safe on all components; electronics, chrome, paint and plastic
- Use on heads, cooling fans, throttle linkages, brake cables, battery terminals, voltage regulator, suspension, engine components, torsion bars, fuel control units, fuse box, swingarm, relays / connectors, undercarriage, chain, ignition switch, security systems / FOBs and more!
- ACF-50 can be sprayed on, wiped on with a rag, or professionally fogged for complete protection

CORROSION BLOCK®
High Performance
WATERPROOF
GREASE

Prevention is better than replacement!

Corrosion Block is a unique product that has the ability to both prevent and stop corrosion in more places on Powersports Equipment than any other product of its type.

Corrosion Block is superior anti-corrosion compound. It kills corrosion in progress, prevents new corrosion cells from forming for 12-18 months, is an excellent penetrant and is an excellent light lubricant.

CORROSION BLOCK AEROSOL

Kills Corrosion on Contact!

Protects metal and electronics during play and storage • Chemically neutralizes salt water • A clean, clear ultra-thin fluid which leaves a non greasy atmospheric barrier to protect all metal surfaces • Leaves no gummy residue because it does not contain wax, resin, tar, asphalt, silicone or Teflon • Can be sprayed, brushed or wiped on • Hydrophobic film provides corrosion protection all season • Protects metal components down to -70° • Keeps ice and mud from sticking • Combined with its excellent penetrating and strong dielectric properties (40Kv), have brought electronics “back from the dead” • Removes moisture from the corrosion by-product and isolates it from contacting the metal surface, restoring continuity to electrical circuits • Can be used in many different electrical and electronic applications without fear of damaging the conformal coatings used • Does not harm plastics or painted surfaces • Improves reliability, reduces repair and labor cost.

CORROSION BLOCK WATERPROOF GREASE

Out performs lithium and most synthetic greases and meets or exceeds requirements for NGLI Service Classifications GC-LB (automotive wheel bearing and chassis lubricants) conforming to ATM D4950 performance requirements • Excellent extreme pressure properties • Excellent thermal / oxidative stability • Resists bleeding / melting at high temperatures • Suitable for sealed for life applications • Dielectric / non-conductive • Workplace safe and environmentally friendly • Out performs competitive grease 5:1 • Waterproof.

RATCHETING TIE DOWN WITH WEB CLAMP

Erickson's NEW WEB CLAMP was designed to address the problem of what to do with excess webbing. The WEB CLAMP mechanism is much like a mouse trap, lift the spring loaded clamp and place the folded webbing under the clamp, release the spring loaded WEB CLAMP and you have trapped the excess web. Very simple and effective. SO NEAT!!

Rope RATCHET®

- The Rope Ratchet's construction lets you secure a wide variety of loads quickly and easily
- With Rope Ratchet, you simply attach the two hooks and pull the loose end of the rope to the secure tightness you need
- With Rope Ratchet tie-downs, you never have to worry about stretching, snapping back, or loosening
- Your load stays secure because the rope stays locked in place with every pull until you release it by pushing the convenient thumb lever

PROX HOUR AND TACH METERS

PROX HOUR METERS PROGRAM

ProX offers 3 different types of hour meters, with different features and price categories. Motorcycle engines have strict maintenance schedules that must be followed to honor the service life of components and secure reliability of the engine. Knowing what to service and when, is key to a successful preventative maintenance program for your motorcycle, ATV, PWC, boat or snowmobile. All meters are surface mounted meters, which provide what today's Powersports user needs and expect from hour/tach meters. Hour/Tach meters have become the most cost effective method of performing service.

WIRELESS HOUR METER

- ProX also offers a state of art Wireless Hour Meter! Unique by eliminating wires the ProX Wireless Hour Meter is a surface mounted vibration activated hour meter, which provides what today's Powersports user needs and expect from hour meters.
- Installation is easy without needing to install a wire. Solid state electronics, modern LCD, superb environmental durability and enhanced functionality offer the best of all possibilities without sacrifice to performance, operation or budget.
- The wireless hour meter display can be read at all times, with engine off or on. The encapsulate epoxy case is water resistant and shock proof.
- With the ProX Wireless Hour Meter you can measure your hours for hours!

- ProX Wireless Hour Meter Features:
- Easy installation, no battery and wiring required.
- Sensitivity can be set to high or low.
- Partial hours can be reset to zero.
- Works on all 2/4 stroke gasoline engines.
- 100% epoxy encapsulated casing is water resistant and shock-proof.
- Automatic Roll over.

MR. FUNNEL® FLO TOOL™

REMOVES WATER FROM FUEL

The Fuel Filter Funnel by Mr. Funnel is a heavy-duty, anti-static, and fast flow funnel with built-in filter technology. When fuel is poured through the Fuel Filter Funnel, water and debris will not pass through the filter's fluoropolymer-coated stainless steel filter. Only filtered fuel flows through to your engine, improving its efficiency, durability, and proper operation. The sump area collects the deflected water and debris for proper disposal. The Fuel Filter Funnel by Mr. Funnel will filter gasoline, diesel, heating oil, kerosene and 2-cycle mixed gas.

Flexible Spout Extension
for use with 232001 funnel only

232004	6.99

What Model Do I Need?

The Mr. Funnel Fuel Filter comes in four different fast-flow models (See below). Models differ mainly on flow rate. If your need is to transfer five gallons or less of fuel, then the F1 and F3 are for you. If you are transferring more then 5 gallons, then the F8 and F15 are right for you. Our F15 is our fastest flow model at up to 15 gallons per minute! This model can also be used at a fuel pump. Get your Mr. Funnel Fuel Filter today, and keep your engine running smooth!

Our fastest flow model, this model can also be used at a fuel pump.

CALIFORNIA COMPLIANCE

Due to restrictions on the sale of containers in California, Automatic Distributors has updated part numbers for VP Racing containers. The products will remain the same, apart from different verbiage on the bottom of the cans. There is no change for the caps, vents or hoses. These new Cali part numbers can be sold everywhere and are no-longer considered restricted in the state of California. The chart below indicates the old part numbers on the left, and the new numbers to the right which are under the CALI column.

TRIGGER
FLUID CONTROL SYSTEM
DELIVER POWER TO YOUR MACHINE

MADE In USA

- Ergo push button operation
- No-spill design
- Variable fluid flow rate control
- Self venting
- Over 3 gallons per minute flow rate
- High quality materials
- Manufactured and assembled in the USA

HIGH VOLUME FLUID DISPENSING WITH COMPLETE CONTROL

The Trigger is designed to allow variable fluid delivery over 3 gallons per minutes. Once the Trigger is installed on your utility jug the days of spilling on your expensive graphics or machine will be over. Because the Trigger is self-venting, you will no longer need to open a separate vent on your utility jug to increase your fluid flow. Leave your vent closed. Simply press the Trigger button and fluid flow. Your desired rate of flow will be determined by how far you press the button. Once you have reached your desired fill level, release the button and fluid flow will stop. The result is a clean, completely controlled delivery of fluid.

VP RACING TRIGGER

700001	28.95

Insert Ventilation Tube. Push FIRMLY and twist until you feel the tube fully seat.	Correctly assembled Trigger.
Apply downward pressure when hand tightening. Ensure correct thread alignment to avoid cross-threading. Do not over tighten.	Tilt container. Press trigger for flow. Release trigger to stop flow. Keep button upright while pouring.
Trigger is self-venting. Ensure all vents on container are closed.

GRUNGE BRUSH™

Chain and gear cleaning has never been faster or easier! Scrub the chain with the horseshoe shaped bristles at one end of The Grunge Brush™ to clean all four sides of the chain. Use the long bristles on the other end of the brush to clean components like sprockets, derailleurs, cranksets, brakes and pedals.

Regular component cleaning prevents premature wear and tear on chain and sprockets, eliminates chain skipping caused by dirt and grunge, and assures smooth operation of drivetrain and brakes.

The Grunge Brush™ can be used dry or for deep cleaning action, use it with Citrus Bike Chain Degreaser or Multi Bike Degreaser, by simply spraying degreaser onto the chain or directly onto bristles. Grunge Brush™ scrubbing action, coupled with a Finish Line bike degreaser, will leave your drivetrain looking like new

HULL HUGR

PWC FENDERS

Personal watercraft require specialized fenders to prevent damage from floating underneath docks designed for boats. These 3" x 18" fenders have nylon covers and attach to PWCs with 2 giant suction cups or secure under your hood and seat. Great for docking, rafting boat to boat, PWC to boat, or PWC to PWC. 2 per Package. Color: Black.

PWC FENDER

Docking a PWC has never been safer with the introduction of the HULL HUGR PWC Fender. Engineered specifically for PWCs, it hinges in the center to better protect PWC bodies from docks designed for bigger boats. It hooks under the rub rail with a molded acetyl hook integrated into the back of the fender. If your PWC has them, you'll want to connect the top of the fender to a cleat or ski eye with the adjustable strap and vinyl dipped steel hook provided. If not, simply thread the strap though the rubber block provided and place it inside the PWC's storage compartment, then shut it. The block anchors the fender strap perfectly and will not damage the body. We recommend 2 fenders per PWC. Fits all PWCs.

AIRHEAD

BUNGEE DOCK LINE

AIRHEAD Bungee Dock Lines absorb shock to boats, cleats, docks, pylons and other hardware. The bungee cord is hidden inside the rope and acts as a built-in snubber. Two foam floats protect the boat from chafing. There's a sliding adjustment at both ends for quick docking. Recommended for docking boats and PWCs up to 4,000 pounds. Tensile strength is 2,150 pounds. Black/Blue/Red color scheme.

CONTOUR FENDERS, 24" LONG X 2-1/2" THICK

Traditional round fenders tend to roll up, leaving your boat unprotected. They're also bulky to stow. Boats with step-down gunwales are especially vulnerable to damage from docks. HULL HUGR Contour Fenders stay put and stow conveniently under boat seats. They hinge to wrap around the gunwale and hull, following the contours of the boat. All HULL HUGRs are constructed of an durable marine grade tri-laminate cover, with closed cell foam inside. There's a tough polycarbonate grommet at each end for hanging from cleats.

CONTOUR FENDERS, 30" X 6" X 4"

Traditional round fenders tend to roll up from contact with docks, leaving your boat unprotected. They're also bulky to stow. Boats with step-down gunwales are especially vulnerable to damage from docks. HULL HUGR Contour Fenders stay put and stow conveniently under boat seats. They hinge to wrap around the gunwale and hull, following the contours of the boat. FLAT FENDER

You'll really appreciate how the HULL HUGR Flat Fender stays put, unlike round fenders that roll up leaving your boat unprotected. They're also more compact, so they're much easier to stow under boat seats. The Hull Hugr Flat Fender is 26" long x 6" wide x 2 1/2" thick. It's constructed of durable marine grade tri-laminate with a polycarbonate grommet at each end. Hang them vertically or horizontally. Great for mounting to docks and posts too!

SAFE-T-CLEAT

The number one cause of boating accidents is darkness. The Safe-T-Cleat is an eco-friendly solar powered dock cleat that creates enhanced visibility in all weather conditions. The 12-inch long cleat incorporates a solar panel that powers its integrated LED night light for up to ten hours when completely charged. Made from heavy duty, scratch resistant fiber-glass reinforced plastic; it resists rope chafing and withstands pressure up to 22,000 PSI. The Safe-T-Cleat comes in your choice of an ivory, black, or clear finish. Four mounting holes provide a wide footprint for secure docking of small and medium sized vessels up to 38' in length. Perfect for mounting on any flat surface, Including: docks, seawalls, pontoon boats, and floating diving platforms. The Safe-T-Cleat operates using one 1.2V NI-MH battery and is included. Battery replacement is also easy. Four 3/8 bolts are required for installation. Bolts not included. The Safe-T-Cleat was designed with safety in mind. Made in the USA.

Product Features:
- Lights automatically to provide a safe, eco-friendly dock environment
- Wide footprint provides docking security for any small to mid-size pleasure craft
- Long lasting replaceable battery
- Heavy-duty scratch resistant fiberglass reinforced plastic
- No rusting or rope chafing

THE CLEAT SEAT

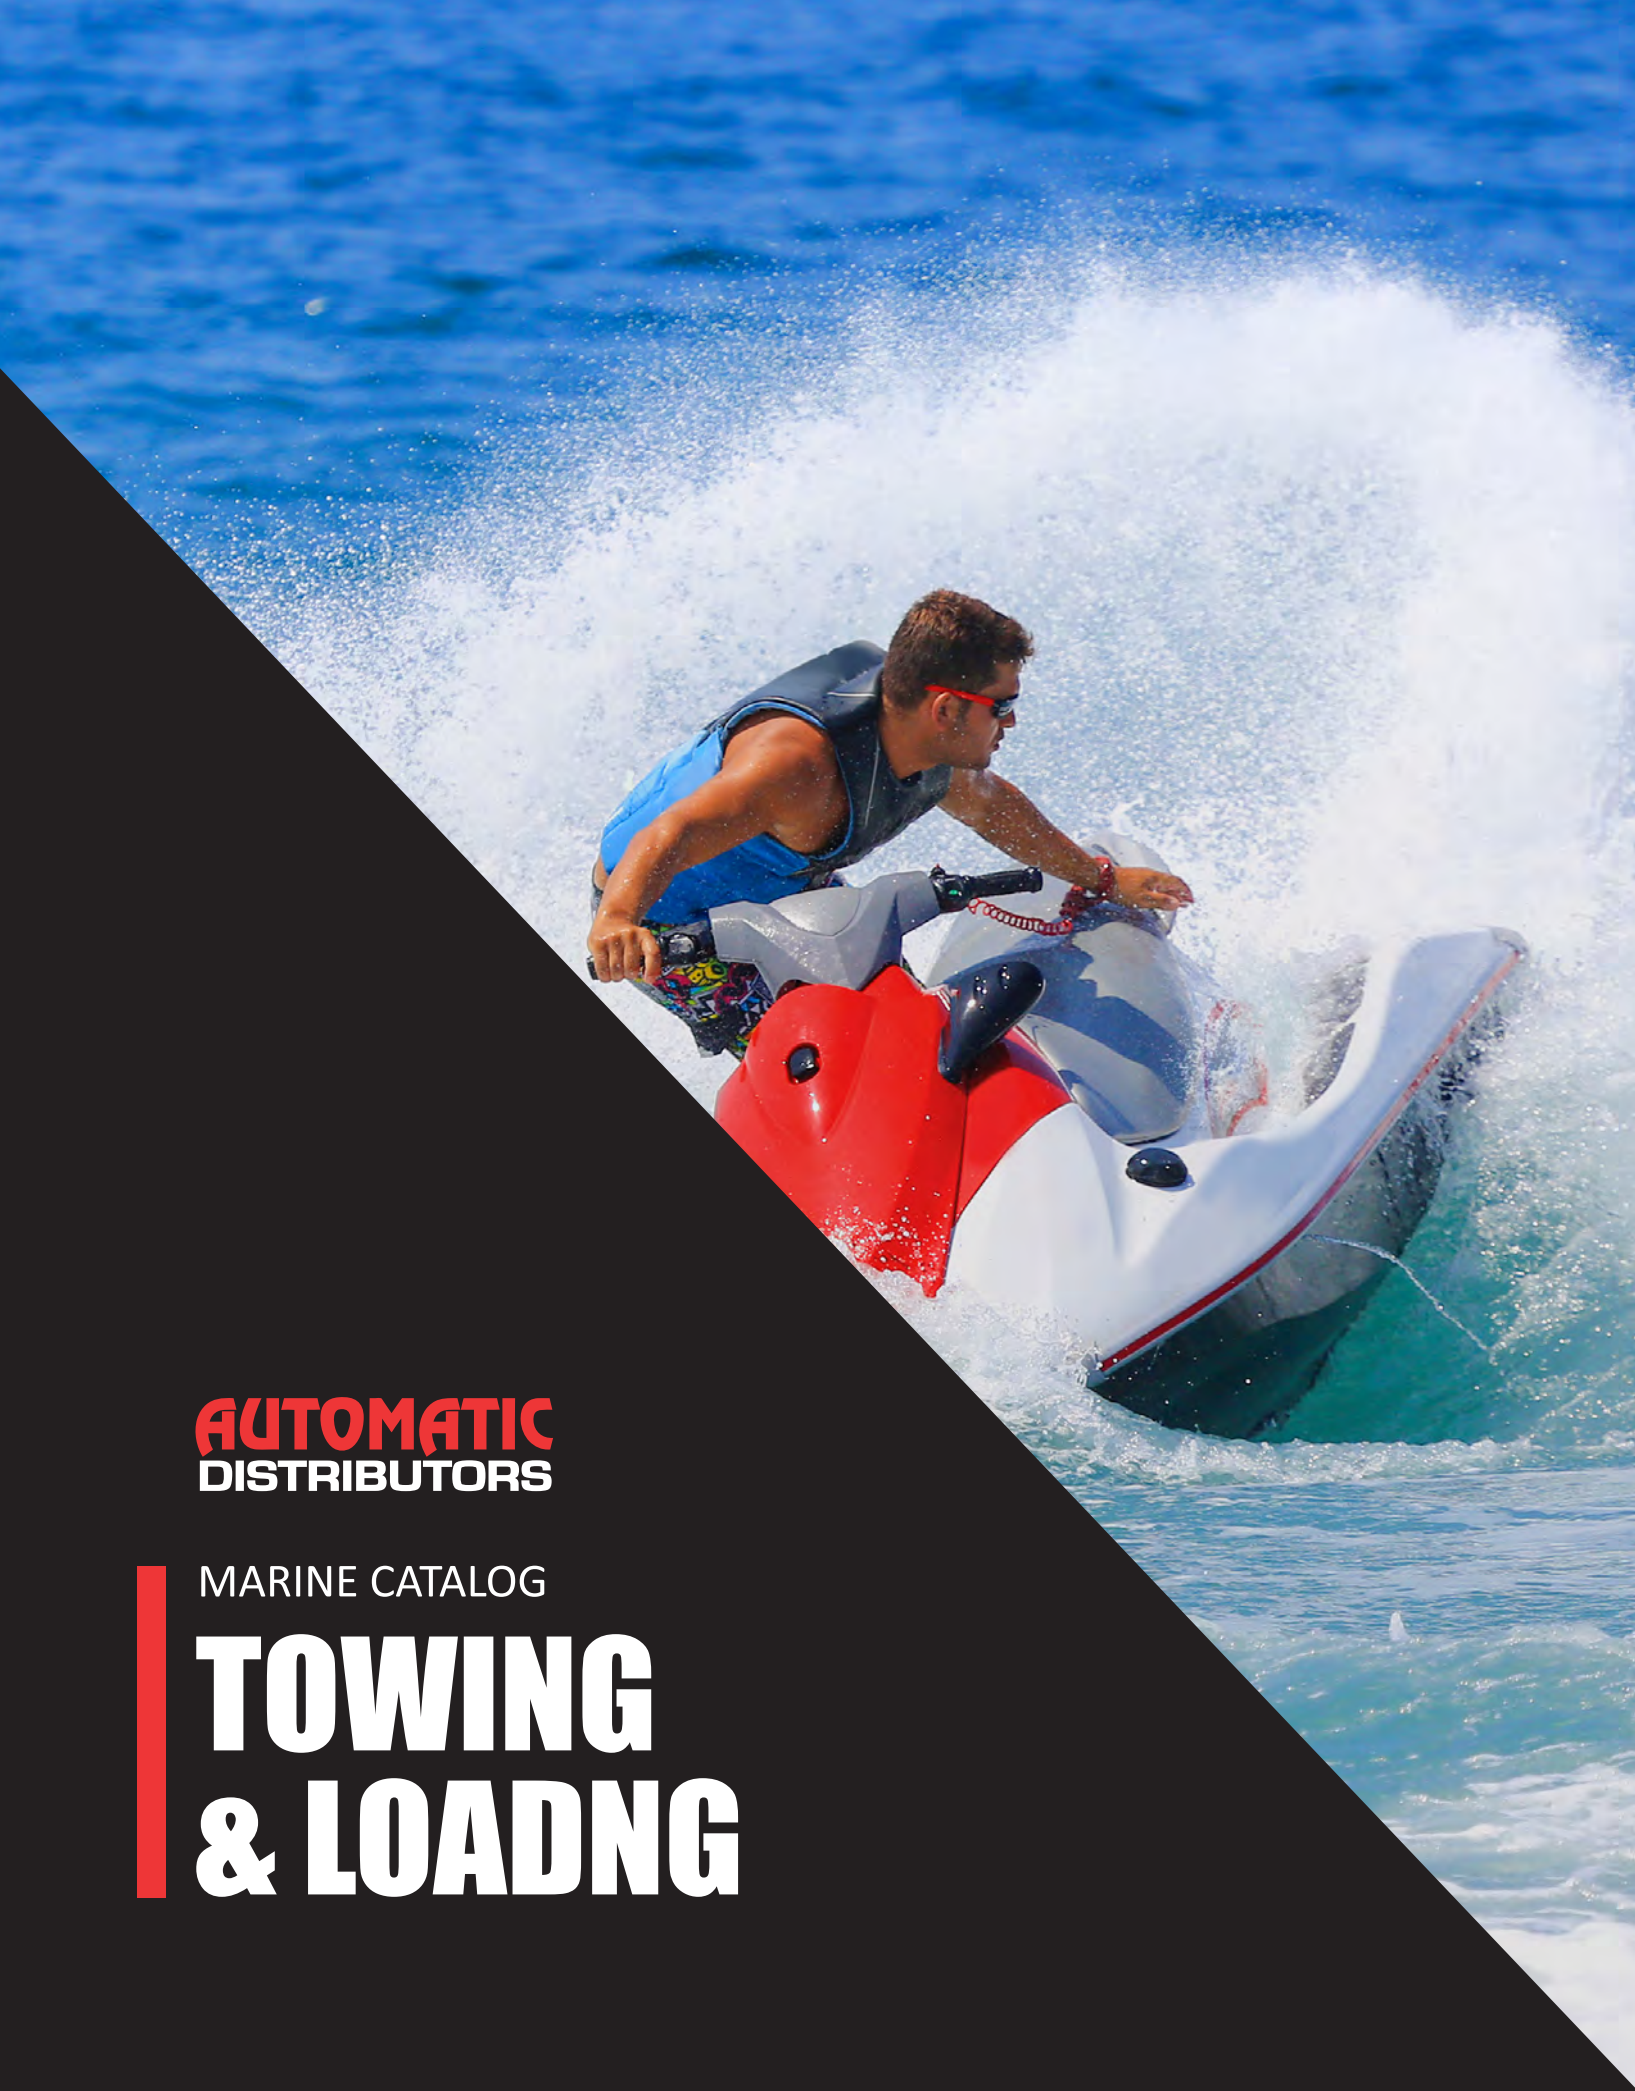

The Cleat Seat Retractable Dock Cleat is the cleat seat that won't hurt your feet! The Cleat Seat provides the convenience of a dock cleat without the stubbed toes that often come along with them. This sturdy 6.5 inch x 10 inch dock cleat features a 2.75 inch high cleat that folds into a 1.25 inch low profile base to provide a smooth top surface. Coupled with its angled sides, this patented design prevents toe stubbing and tripping, and is a boating safety innovation that is provided only by CIPA. The Cleat Seat is also both strong and durable. It is made of a nylon composite that is rated at 27,000 pounds per square inch of tensile strength. The materials will not corrode in salt air, and is UV stabilized to deflect heat up to 400 degrees Fahrenheit. The Cleat Seat provides more safety and style than the old fashioned aluminum cleats. Accepts up to 1/2 inch dock line. The Cleat Seat is available in solid black, or in white with a black cleat part number 02101 (CS101). Mounting hardware not included.

Product Features:
- Strong Nylon composite is rated at 27,000 pounds per square inch tensile strength
- Durable Materials will not corrode in salt air. UV Stabilized-heat deflection to 400 degrees Fahrenheit
- Attractive Looks much nicer than aluminum cleats
- Safe The cleat is not exposed when not in use
- Safe The sides of the cleat are angled to prevent toe stubbing and tripping

DRIVELINE SHAFTS

The drive shaft is a mechanical component that transfers power from the crankshaft to the impeller.

WEAR RINGS

All wear rings meet or exceed OEM quality for direct fitment.

IMPELLER SHAFTS

The stainless steel shafts are guaranteed to fit where an OEM would fit. They bring back the balance and performance of any jet pump.
