EMGO BRAKES

EMGO Replacement Disc Brake Pads meet or exceed manufacturers specifications. Replacement pads are available in two types, Sintered and Full Metal. Sintered Metal is a high performance brake pad material designed from a highly refined composition of metallic powder pressed into a preform mold. EMGO Full Metal pads are made of additional metallic compounds for higher friction and durability. Sold by the pair, (some models require more than one set)

EMGO Replacement Brake Shoes meet or exceed manufacturers specifications. They are available in two types: Replacement OEM (standard) and water grooved, which are slotted to help channel water and dirt away from the braking surface. Sold by the pair (some models require more than one set), each set is boxed. Like our pads, we label each set with application information and each box has a reinforced hang tab for point of sale display.

STREET BIKE BRAKE HOSES (CLEAR)

Russell's Cycleflex Street Brake Hose Kits incorporate the convenience and reliability of factory assembly for trouble-free installation, requiring no additional components. Our precision double crimp technology ensures permanent end attachment and precise alignment for uncompromised fit. Street Brake Hose Kits are engineered utilizing a Teflon® inner liner, supported by a rugged 308 stainless steel braid. This stainless steel braid eliminates the brake hose expansion that factory rubber hoses experience, resulting in better braking performance and improved lever feel. Cycleflex street bike brake hose kits duplicate the routing of the factory brake hoses (including sport bikes with a two line arrangement from the factory), and come complete with all necessary hardware. The stainless steel braid enhances the appearance of any street bike, and when you consider that in most cases CycleFlex brake hoses are less expensive than the original rubber hoses, you have a value that can't be beat! Cycleflex Street Brake Hoses meet all the guidelines of the D.O.T. MVSS-571.106 requirements to deliver an extra margin of safety and are 50-state legal.

SPEED BLEEDERS® - TAKE THE WORK OUT OF BRAKE BLEEDING

The Russell Speed Bleeder simplifies the troublesome job of bleeding your brake system and makes bleeding your brakes a one person task. Replace your original bleeder screw with our patented Speed Bleeder and you are ready to start. All you do is open the Speed Bleeder 1/4 to 1/2 turn and pump your brake lever continuously. Our patented check ball design allows the old fluid and air to be pushed out, but closes between pumps, preventing the old fluid or air from getting back into the system. When all the old fluid is purged from the system, tighten the Speed Bleeder and you're done! Speed Bleeders are available for stock or aftermarket calipers.

TECH TIP

After installing your new Cycleflex brake hoses, your brake system will have to be bled, of course. here are a couple of tips that will make this task much faster and easier.

1. Speed Bleeders are available for most motorcycles, cars, trucks, and virtually anything else with hydraulic brakes or clutch. First, we suggest that you prime your new hoses before installation. Using the proper brake fluid and an eyedropper or small syringe, squirt brake fluid into one end of the hose until it comes out the other end. You do not have to completely fill the hose, as long as the inside of the Teflon® liner is coated with fluid.

2. Install the hose using new sealing washers and torquing the banjo bolts to factory specifications. Now install Russell's patented new Speed Bleeder in place of the original bleeder valve in the caliper. The Speed Bleeder has a spring-loaded stainless steel check ball in it that allows for one person brake bleeding.

3. Open the Speed Bleeder 1/4 to 1/2 turn and continuously pump the brakes. Every time you pump, the check ball is pushed off its seat, allowing the fluid and air out. Between pumps, the spring closes the check ball, preventing any air from getting back into the system. Make sure you keep the master cylinder reservoir full during bleeding.

4. When all the air is bled out of the hoses, tighten the Speed Bleeder down and you're done!

Speed Bleeders are available for most motorcycles, cars, trucks, and virtually anything else with hydraulic brakes or clutch.

TWO LINE RACER UNITS (CLEAR)

Russell's Cycleflex Two-Line Racer Kits utilize a Teflon® inner liner supported by a stainless steel outer jacketing to eliminate brake hose expansion for a firm brake lever time after time. These kits consist of two brake hoses that connect directly to the master cylinder using a double length banjo bolt (supplied), with the longer hose attaching to the left caliper, shorter to the right caliper. This eliminates the OEM three hose set-up and brake junction making brake service at the track simpler and improving brake performance. All two line racer kits come with extruded clear coat to protect against abrasion of painted surfaces. Cycleflex Two-Line Racer Kits meet all the guidelines of the D.O.T. MVSS-571.106 requirements to deliver an extra margin of safety and are 50-state legal.

SPEED BLEEDERS® - TAKE THE WORK OUT OF BRAKE BLEEDING

The Russell Speed Bleeder simplifies the troublesome job of bleeding your brake system and makes bleeding your brakes a one person task. Replace your original bleeder screw with our patented Speed Bleeder and you are ready to start. All you do is open the Speed Bleeder 1/4 to 1/2 turn and pump your brake lever continuously. Our patented check ball design allows the old fluid and air to be pushed out, but closes between pumps, preventing the old fluid or air from getting back into the system. When all the old fluid is purged from the system, tighten the Speed Bleeder and you're done! Speed Bleeders are available for stock or aftermarket calipers.

CYCLEFLEX OFF-ROAD - DUAL SPORT AND MOTO CROSS BRAKE LINES

Russell's Cycleflex Off-Road/Dual-Sport/Motocross brake hoses are engineered to deliver optimum performance and reliability. Cycleflex hoses feature our PowerFlex Hose Series that utilizes a Teflon® inner liner supported by a rugged 308 stainless steel outer jacket. This combination ensures a lightweight assembly that withstands prolonged flexing, aging and vibration without expansion, delivering enhanced brake performance. A section of hard tube prevents the hose from fouling the wheel or fender during suspension travel. Our precision double crimp technology ensures permanent end attachment with precise alignment for ease of installation and an uncompromised fit.

- All Russell dual sport and motocross brake hoses include a hard plastic tube to protect your wheel and fender.

- **Connecting Link Reference** - SL: Spring/Clip Link, RL: Rivet Link, DL: Dual Link (contains both link types)
- **Pin Riveting** - Pressed four times for an extra strong rivet that resists powerful lateral forces on the outer plate
- **Solid Bush** - Solid bushes provide enhanced resistance to distortion from repetitive shock loading
- **Riveted Bush** - All 520 HDR/HDS/X1R/X1R2 have riveted bushes that resist powerful lateral forces on the inner plate
- X-**Ring Seal** - X-Ring seals offer better sealing than the conventional O-Ring and produce far less friction. All sealed JT chains are equipped with X-Rings

MVXZ Series

OUR SUPREME QUADRA-X RING CHAINS, THE IDEAL OE REPLACEMENT.

EK's MVXZ Quadra-X Ring chain is the ideal replacement chain for any 600 to 1000cc street bike. Features like lightening holes in the sideplates,large-diameter pins, and friction-reducing Quadra-X Rings help ensure high-performance and from 1 1/2 to 2 times increased wear life when compared to a standard O-Ring chain.

Every MVXZ chain features EK's Quadra-X Ring design. This innovative sealing technology results in reduced friction and increased chain life. Lab tests show that a Quadra-X Ring chain can last from 1 1/2 to 2 times longer than a standard O-Ring chain.

- Recommended application: up to 1000cc/100hp for 520MVXZ; up to 1000cc/130hp for 525MVXZ; up to 1000cc/145hp for 530MVXZ
- Available colors: gold, chrome,
- Tensile strength: 9000 lbs. for 520MVXZ; 9300 lbs. for 525MVXZ and 530MVXZ
- Available lengths: Up to 120 links for 520MVXZ; up to 130 links for 525 and 530MVXZ
- Zero Stretch Technology available as an option on some MVXZ chains

Z-RING CHAIN

- The Z-ring flexes when assembled, creating a spring effect that guarantees the seal will not diminish over time.
- The lubricant trapped between the plates and the lobes of the Z-ring keeps the ring lubricated and increases its life.
- ZR chains are the best choice for the most severe and demanding applications. Among other characteristics, the ZR chains feature high alloy steel plates and pins, solid bushings and rollers, shot-peening of plates, pins and rollers, performance-enhancing pre-stretching and “gold” outer plates.

PRESS-FIT CHAIN LINK TOOLS

Since about 1990, most new chains use press-fit type side plates on the connecting links. On this type of link, the side plate can not be installed properly without the aid of a special tool. The chain manufacturers have decided the press fit adds strength to the connecting link and should always be used. The Motion Pro chain press tools below are designed to install the press-fit connecting links on 520-530 standard and O-ring chains.

- Versatile enough to be used on cam chains or drive chains
- Will break chains from #35 to #630
- For chain 520 and up, it is recommended to grind to rivet head
- Each kit includes 3 pin sizes to fit most chains
- Features new & improved investment-cast-hardened body and redesigned body bolt
- Now the kit includes press places
- Recommended for light to medium duty use

ALL BALLS SWING ARM BEARING KITS

- Patented fork seal features a balanced 3 lip design that evenly distributes the pressure reducing operating temperature, wear and friction
- Custom Elastomer Fork Seals have been tested to outlast OEM fork seals. Extends typical seal life by 3 to 5 times over OEM seals
- Stiction (friction) measures from 1/3 to 1/2 less than OEM seals for smoother fork action
- Lower Stiction, Longer Life! It doesn't get any better than this!
- Plus, the only complete line of dust wipers! Wipers should be replaced with the fork seals to assure peak performance

S100 TOTAL CYCLE CLEANER

If you've been using a bucket of car suds or a quick detailer, chances are you been missing the most important and threatened places on your bike…those hidden nooks and crannies where dirt can hide. Why isn't that ok? Dirt traps moisture and the moisture can't dry out. The result is corrosion, rust and tarnish and you can't even see it happening! S100 Total Cycle Cleaner works differently by creeping to find the hidden soils you can't see, then penetrating and loosening them so a sharp stream of water can remove them. The result is a bike that is clean everywhere, not just where can see. Simply put, it's better for your bike. (You don't have to tell your friends it's quick too.)

S100 SHINE-ENHANCING CLEANSER AND S100 CARNAUBA PASTE WAX

Ready to get the ultimate shine? Experts agree that waxes with cleaners in them are compromise products, that the cleansing and waxing steps must be done separately, so that's what we've done. Use our two step S100 Cleanser and S100 Paste Wax system, we can virtually guarantee you can put your bike in a show! Get your bike clean and dry, then begin with our S100 Shine-enhancing Cleanser. Professional painters and detailers agree that proper surface preparation is fundamental to getting the ultimate shine. The S100 Cleanser gently removes water spots, small swirl marks and imbedded road film to set up the surface for the ultimate shine, all without scratching even sensitive clear coats! Now you're ready for the ultimate wax job with our S100 Carnauba Paste Wax. Free of abrasives and cleaners and made with a unique blend of carnauba (the world's hardest wax) and beeswax, you will be amazed at the depth of shine and darkening of dark colored surfaces. And we've eliminated two common annoyances, powdering during rubout and white stain residues on plastics and rubber! And it's so easy to apply and remove, some bikers tell us it's as easy to use as a liquid!

S100 DRYING TOWEL

There's not much point in getting a bike washed quickly, if you can't get it dried quickly. That's why we introduced the amazing S100 Drying Towel. More drying power than a natural chamois, yet it never gets stiff so it's always ready to use. Lint free, it stores in its own plastic pouch so it's ready to pull out of the saddlebag. Made from 100% biodegradable materials without using CFC's or formaldehydes.

S100 DETAIL + WAX

OK, we know there are some times when your bike isn't really that filthy, maybe just a bit dusty, rain-spotted or covered with bugs. We've got something for that, too. S100 Detail + Wax removes that dust, those spots, and the bug residue. And its unique carnauba and beeswax ingredients replace them with a "gangbusters" shine. Just think of it as a wash and wax in one! It's easy to use, too. Just spray a bit on a soft cloth or onto the bike's surface and rub to a high gloss. Pack a can in the saddlebag and you're ready for a dusty road or that surprise rain shower. No wonder an independent test rated S100 Detail + Wax "... the most consistent performer of all".

S100 DETAILING SET & S100 DETAILING SWABS

If you're fussy about caring for your bike, it's important not to skip the details! The S100 Detailing Set enables you to get into those tough to reach nooks and crannies. The 25 USP grade swabs are so flexible they can be bent 90° to reach around corners. Use them to apply other S100 products such as S100 Total Cycle Cleaner or S100 Corrosion Protectant, too. The S100 Detailing Set also includes an ultra-soft polishing cloth for dusting, rubbing out polishes, waxes, etc. Refill the Detailing Set with the 50 piece Detailing Swabs pack.

S100 WHEEL CLEANER

Sometimes those road wheels need some extra cleaning power to get them back to that "like new" look. And, worse yet, that brake dust (it contains metallic particles!) can become corrosive if allowed to stand for awhile. If you find that brake dust build up is hard to keep up with, we recommend you try our S100 Special Performance Gel Wheel Cleaner. It provides up to 50% more cleaning power than our Total Cycle Cleaner thanks to the clinging power of its unique gel formulation. Spray on and allow to stand (you control the amount of cleaning you need, see directions on bottle), then rinse thoroughly. Neither acid, nor lye-based like cheaper products, S100 Wheel Cleaner provides complete surface safety for any type of wheel or wheel finish, including those tricky anodized finishes.

S100 CORROSION PROTECTANT

No matter how clean you keep your bike, you always have to be on the lookout for that dreaded "enemy number one", corrosion. Unless you live in the desert, humidity, salt air, spring road salt and plain old pollution threaten your bike's "precious metals". That's why we developed S100 Corrosion Protectant. Just spray on a clean, dry bike (or into a cloth) and rub into the areas you want to protect, those sensitive areas like fork tubes, case covers and wheels (and don't forget those hidden areas you can't reach.). You'll find that S100 Corrosion Protectant won't rub off easily in the rain and so its protection really lasts. It even dramatically out-performed a famous so called "corrosion fighter", so this is really the way to protect your investment!

Important note: This is the perfect product for winter lay up and long term storage. Spray directly on all sensitive areas and allow to dry.

For small areas, our S100 Finish Restorer is the perfect solution. It can renew tarnished metals (aluminum, stainless, chrome etc.) to a brilliant shine, even often take small scratches out of plastics. It rubs out easier than ordinary polishes and doesn't come with that ugly ammonia smell, either! No wonder Motorcyclist Magazine called it "the nearest article to a miracle finish maintenance product…"

Salt Off® Concentrate is specifically formulated to quickly and effectively remove salt deposits from metal, fiberglass, plastic or painted surfaces. It contains special polymers that bond to the treated surface to help prevent the formation of future deposits. Depending on the application, Salt Off® can be sprayed directly onto the surface to be treated and then rinsed with fresh water, or simply left in place.

The formula is safe for use on all boats, vehicles, trailers, marine parts, engines, fishing and dive gear and more. It will not etch, stain or otherwise damage metal or plastic surfaces. It is ideal for removing salt water deposits from boats and fishing gear, as well as for protecting cars or trailers from the damage caused by exposure to road salt.

Salt Off® is also very effective at protecting marine engines used in salt water; when used with the Salt Off® Applicator, it will flush deposits from the engine's cooling system to help insure maximum performance and service life. The Applicator can also be used to more easily apply Salt Off® to large areas.

Salt Off®is available in convenient, Ready to Use, 22 ounce spray bottles as well as in concentrated form, in 32 ounce and 1-gallon containers.

Star brite's ULTIMATE XTREME CLEAN is formulated with the latest technology ingredients to be the toughest crud-buster ever. The special chelating agents attack road grime, bug bits, bird deposits, greasy smears and more, breaking the bond that holds them to the surface so they can be wiped away without heavy scrubbing. However, unlike most all-surface cleaners that use cheap, harsh ingredients, Xtreme Clean does not contain caustic, dangerous chemicals that can damage the finish. Xtreme Clean is safe for use on all metal, fiberglass, plastic, chrome, stainless, wrapped, leather and rubber surfaces.

MR. FUNNEL® FLO TOOL™

REMOVES WATER FROM FUEL

The Fuel Filter Funnel by Mr. Funnel is a heavy-duty, anti-static, and fast flow funnel with built-in filter technology. When fuel is poured through the Fuel Filter Funnel, water and debris will not pass through the filter's fluoropolymer-coated stainless steel filter. Only filtered fuel flows through to your engine, improving its efficiency, durability, and proper operation. The sump area collects the deflected water and debris for proper disposal. The Fuel Filter Funnel by Mr. Funnel will filter gasoline, diesel, heating oil, kerosene and 2-cycle mixed gas.

Flexible Spout Extension
for use with 232001 funnel only

HOSE BENDER - GAS CAN SPOUT

DESCRIPTION	COLOR	MFG	PART #	
Hose Bender - Gas Can Spout	Red/Black	00283	**989333**	**19.99**

Getting the spout of a full gas can in and out of the small fill tank hole is always a challenge, which usually ends up with spilled fuel. Risk Racing now offers the **"Hose Bender"** spout, a utility jug spout which uses the cap and lanyard to create a natural bend to the hose. This bend is what makes it easy to place your spout into your gas tank without spilled fuel. It also makes pulling the hose out of the tank easy, reducing spilling and spraying when your tank is full and you need a quick exit.

The **Hose Bender** also helps stabilize your utility jug while pouring. This stability is maintained by a hook located at the end of the Hose Bender spout which rests the lip of the tank being filled. This simple but innovative design feature is a huge asset when filling any tank.

Finally, the **Hose Bender** is constructed from HDPE Plastic ensure it is chemical resistant and durable. Thread this universal spout onto the Risk Racing EZ3 Utility Jug, or any other powersports style utility jug with a ¾" thread in the top of the cap.

GRUNGE BRUSH™

Chain and gear cleaning has never been faster or easier! Scrub the chain with the horseshoe shaped bristles at one end of The Grunge Brush™ to clean all four sides of the chain. Use the long bristles on the other end of the brush to clean components like sprockets, derailleurs, cranksets, brakes and pedals.

Regular component cleaning prevents premature wear and tear on chain and sprockets, eliminates chain skipping caused by dirt and grunge, and assures smooth operation of drivetrain and brakes.

The Grunge Brush™ can be used dry or for deep cleaning action, use it with Citrus Bike Chain Degreaser or Multi Bike Degreaser, by simply spraying degreaser onto the chain or directly onto bristles. Grunge Brush™ scrubbing action, coupled with a Finish Line bike degreaser, will leave your drivetrain looking like new
