*The information and images above are intended for informational use only. Images may not represent exact measurements.

TRUE OFFSET: The measurement from the wheel's mounting surface to the center line of the wheel. This measurement will be stamped in the back of your wheels as ET. ET is another term used to describe wheel offset. Example: -47mm / 0mm / +5mm / +10mm / +30mm / +38mm / +40mm

INDUSTRY OFFSET: Also known as Back Spacing, is the measurement from the wheel's mounting surface to inside the rim Flange on the Back Side of the wheel. In the ATV/UTV world, Back Spacing is used as a description of offset and generally looks like this... 2+5, 4+3, 5+2, or 6+1. This measurement description roughly indicates how much wheel will be on the inside and outside of the Wheel mounting surface.

DISCLAIMER: Please note, offset and or backsparing measurements are determined by the wheel manufacturers. Measurements can vary slightly between wheel brands. This chart is designed to provide you with a general overview and description of wheel offset and or backsparing measurements. Changing from an OE (Original Equipment) offset can cause clearance issues. Check all clearances at all suspension positions before use.

A12-SQUAD

- Aggressive multi-spoke directional design with an internal rib for added style and strength.
- Constructed out of heavy duty A356 aluminum with a forged 6061 beadlock ring with Grade 8 zinc beadlock hardware included.
- Available in 15" for most UTV fitments.
- Engineered to be one of the strongest wheels available.

A17-ALPHA V

- The new Raceline A14V Alpha non-beadlock wheel was designed exclusively for the new Polaris RZR R in 5x114.3 bolt pattern. Its aggressive 12 scalloped spoke design takes its cues from the recently released A14 Alpha Beadlock but with an ultra clean lip.
- Constructed out of heavy duty A356 aluminum.
- Black-Out snap-in Raceline cap with contrasting red Pro Spec beadlock logos.
- Available in 15x7 exclusively for the Polaris Turbo R and Pro R.
- Engineered to be one of the strongest wheels available.

ATV/UTV NON-BEADLOCK WHEELS

A95-TROPHY

- Strong 10 spoke design, the UTV version of the 934 Clutch for trucks.
- Constructed out of heavy duty A356 aluminum with a simulated beadlock ring area finished off with stainless steel bolts.
- Engineered to be one of the strongest wheels available.
- Includes a satin black snap-in cap with embossed chrome Raceline logo.
