TRILIGHT CEILING LIGHT

The TRiLIGHT motion sensing LED ceiling light replaces the dim light bulb typically found in your garage, basement or utility room. Upgrading to 4000 True Lumens Bright White LED light and motion activation is as easy as screwing in a light bulb! Now with adjustable motion sensitivity!

Page 264 in Tools

MOTION ACTIVATED LIGHTING SYSTEM

The MPI creates five points of light, all from your existing fixture! These 5 points spread light to all corners of the room, filling the entire space and reducing shadows caused by single-point illumination. This system installs in minutes and is powered by a standard ceiling fixture, eliminating the need to hire an electrician to properly light large spaces like a garage, attic, or basement.

TRILIGHT SHOPLIGHT V2

TRILIGHT SHOPLIGHT V2

The TRiLIGHT ShopLight V2 has the ability to quickly transform from a 360 degree drop light, into a single direction shop light, and any light pattern in-between. This adaptability offers a wider variety of more useful light arrays in comparison to traditional lighting.

FLEX-COIL HEAVY DUTY ADAPTERS

Flex-Coil™ adapters provide the user with increased durability and additional length that may be necessary to reach between the tow vehicle's socket and the trailer/towed vehicle's plug.

In addition, Flex-Coil™ adapters with Nite-Glow™ illuminate upon activation of the taillight function.

This enables the user to find the electrical connection in the dark and show that the vehicle's trailer wiring system is working properly.

TAILLIGHT CONVERTERS

WHICH CONVERTER DO I NEED?

POWER TAILLIGHT CONVERTER

These units completely isolate the tow vehicle from trailer malfunctions. Power is taken directly from the battery for isolation and brighter trailer headlights. Each unit can power up to 2 sets of stop/turn signals (8.0 amps) on the trailer.

SHORT-PROOF POWER TAILLIGHT CONVERTER

Protects tow vehicle electronics and itself from wiring shorts. Self-resetting.

PART #	MFG #
646365	46365 107.95

Short circuit protected. Can power up to 8.0 amps per output.

NEGATIVE INPUT SHORT-PROOF POWER TAILLIGHT CONVERTER

INDUSTRY LEADING TRAILER BRAKE CONTROLS

PRODIGY® P2 **ADVANCED INTELLIGENCE**

- Reverse battery protection for both vehicle and breakaway
- Designed to work with electric over hydraulic brake systems
- Numerous mounting options – including 360 degree vertical rotation
- Digital display depicts voltage delivery to trailer during braking
- No level adjustment necessary – adjusts to varying terrain as you drive
- Great for backing into tough spots! Works proportionally in reverse - with the ability to disable when not needed
- Produces stops that are in proportion to vehicle's deceleration rate
- "Boost" feature gives users the ability to apply more initial trailer braking power when towing heavier trailers
- Continual diagnostics check for proper connection, shorted magnet conditions and much more
- Quick and easy disconnect feature allows user to remove and store the control when not in use
- Electric trailer brake control for up to 4 braking axles
- Limited lifetime warranty (some conditions apply)
- Display boxed - complete as shown

7-WAY TRAILER EMULATOR

7-Way Trailer Emulator is used for the proper installation and set-up of a brake control when a trailer is not readily available. Brake control set-up is accomplished using a built-in load module that will stimulate electric magnet brakes on a trailer. (The emulator will also check electrical continuity of all circuits in the 7-way blade style connector.)

PRIMUS™ IQ THE SMARTER BRAKING SOLUTION

Primus IQ is a totally proportional electric trailer brake control. This easy-to-set system allows the driver maximum flexibility when determining how the trailer should respond to a braking event. Snap-in dash mounting clip and removable electrical connector allow the unit to be quickly stored (or moved to another vehicle) when not in use.

- Works proportionally in reverse
- No level adjustment necessary, adjusts to varying terrain as you drive
- Digital display shows voltage to trailer during braking
- "The Original Boost" feature allows for customized braking
- Pre-assembled wire harness for simple hook-up and quick disconnect
- Diagnostic features incorporated in LED display
- Electric trailer brake control for up to 3 braking axles
- Limited lifetime warranty (some conditions apply)
- Display boxed - complete as shown

VOYAGER®

The Voyager incorporates Tekonsha's patented braking sensor and is the best value you'll find for smooth and secure trailer braking. It's compact size and features, like a bicolored LED brake monitor (to assure a complete connection to trailer brakes and give an indication of relative braking power being applied) make the Voyager extremely versatile. Voyager minimizes interference with tow vehicle electrical systems, uses a four wire hook up, has a broad setting range and is compatible with most any vehicle.

- Broad control range makes setting quick and easy
- As braking power is applied, the LED changes color gradually from green (completed circuit) to red, to indicate relative braking power
- Advanced electronics minimize false braking for smoother ride
- Electric trailer brake control for up to 4 braking axles
- 5-year limited warranty
- Display boxed - complete as shown

DRAW-TITE I-STOP™ IQ BRAKE CONTROL

A totally proportional electric trailer brake control, the new Draw-Tite I-Stop™IQ is self-leveling so no level adjustment is necessary.

Utilizing the primary sensor technology from Draw-Tite I-Stop™Ultra, the Draw-Tite I-Stop™IQ now includes the "Boost" feature that gives users the ability to apply more initial trailer braking when towing heavier trailers. It works proportionally in reverse for backing into tough spots and includes a snap-in dash mounting clip and removable electrical connector that allows the unit to be quickly stored when not in use. You will appreciate the digital readout depicting a secure electrical connection, amount of voltage delivery to the trailer brakes and diagnostic features incorporated in the LED display.

- Utilizes "Plug-N-Play" port for 2-plug adapters
- Self-diagnostics features will illuminate LED readout when issues occur
- Includes a "Boost" feature
- Works proportionally in reverse
- Snap-in dash mounting clip and hardware included
- Digital LED readout
- Snap-in mounting clip allows user to remove and store the control when not in use
- Limited lifetime warranty

PILOT® BRAKE CONTROL

Pilot has a dark, smoke lens that is ideal for direct light applications, creating optimum visibility to read the large, two-digit display. Pilot has flexible mounting options and can be installed in any direction. Our microprocessor allows you the ability to read the display even when mounted upside down. The Pilot's digital display shows voltage output to the brakes.

- Large easy to read dual digital display shows:
- Properly wired control
- Voltage output to brakes (vs. a percentage)
- Connection to trailer
- Dark smoke lens ideal for direct light applications; performs better than red lens
- Protection against short circuit/loss of ground
- Microprocessor allows control to be mounted upside down and still have a readable display
- Standard mounting bracket included with optional ball mount available
- For use on any 12 volt negative ground system
- Plug & Play feature allows quick and easy connection
- Limited lifetime warranty

TRAILER

All vehicle specific brake control wiring harnesses are available in 2-Plug styles and are clamshell packaged. 2-Plug units are designed for brake controls that have a wiring port built into the back of the unit. Simply plug the brake control end of the wiring harness into the back of the brake control and the vehicle end into the automobile's port. Brake controls that utilize the 2-plug style of wiring harness will be identified with the Plug & Play logo.

TRAILER ELECTRIC BREAKAWAY SYSTEMS & ACCESSORIES

For use on 1, 2, 3, and 4 axle trailers equipped with electric brakes. These complete systems incorporate the highest quality components in trailer breakaway systems. Meet or exceed Department of Transportation (DOT) specifications regarding trailer breakaway and holding requirements. If a breakaway occurs between your tow vehicle and your trailer, the breakaway systems will automatically apply consistent braking power to your trailer brakes. Quick and easy to install, the systems come with a weather/corrosion resistant, heavy-duty polymer case to protect the battery and charger.

MAGNET IDENTIFICATION MAGNETS CAN BE IDENTIFIED BY THE COLOR OF THE WIRE USED

Dexter 7" x 1-1/4"	The magnets are round. Prior to April 1990 they had yellow wires, after 1990 the magnet has white wires. Replacement of magnets will need to be done in pairs and updated to the new magnet along with the lever. The early levers are weak and will bend and hang up as they wear.
Dexter 10" x 1-1/2"	The magnet wires for the early model round magnets are white and the late model oval magnets are yellow.
Hayes 10" x 1-5/8"	The magnet wires for the early model round magnets are red and the late model oval magnets are green.
AL-KO 10" x 2-1/4"	It will have light green wires.
Hayes 10" x 2-1/4"	The early model round will have red wires and the late model will have oval green wires.
Dexter 10" x 2-1/4"	It uses green wires.
Fayette 10" x 2-1/4"	The round magnets will have white wires (obsolete).
AL-KO 12" x 2"	It will have white wires.
Hayes 12" x 2"	The early model round magnet will have red wires, the late model will be an oval magnet with white wires.
Dexter 12" x 2"	It will have white wires.
Dexter Centerline 12" x 2"	The 4.5K axles will have red orange wires, the 6/7K axles will have red wires (obsolete for both sizes).

TRAILER BRAKE ADJUSTMENT**

Brakes should be adjusted after the first 200 miles of operation when the brake shoes and drums have "seated" and at 3000 mile intervals, or as use and performance requires. The brakes should be adjusted in the following manner:

1. Jack up trailer and secure on adequate capacity jack stands. Follow trailer manufacturers recommendations for lifting and supporting the unit. Check that the wheel and drum rotate freely.

WARNING: Do not lift or support trailer on any part of the axle or the suspension system.

2. Remove the adjusting hole cover from the adjusting slot on the bottom of the brake backing plate.
3. With a screwdriver or standard adjusting tool, rotate the starwheel of the adjuster assembly to expand the brake shoes. Adjust the brake shoes out until the pressure of the linings against the drum makes the wheel very difficult to turn.

Note: With drop spindle axles, a modified adjusting tool with about an 80 degree angle should be used.

4. Then rotate the starwheel in the opposite direction until the wheel turns freely with a slight lining drag.
5. Replace the adjusting hole cover and lower the wheel to the ground.
6. Repeat the above procedure on all brakes.

WARNING: Never crawl under your trailer unless it is resting on properly placed jack stands.

Follow the trailer manufacturers recommendations for lifting and supporting the unit. Do not lift or place supports on any part of the suspension system.

CIPA UNIVERSAL CLIP ON MIRRORS

CLIP ON TOWING MIRROR ▶

CIPA's Clip-On Towing Mirror was designed to fit large factory truck and van mirrors. Rubber straps secure the Clip-On Towing Mirror to your vehicle's existing mirror, and easy-to-adjust arms fit tightly for a steady vibration-free ride. The Clip-On Towing Mirror extends your vision further than any OE mirror ever could with a total extension of 7 inches. This mirror will not obstruct your vehicle's existing viewing area. The Clip-On Towing Mirror has a 5" by 7.5" mirror face that widens visibility, in addition to your factory mirror, for peace of mind while towing. It will fit up to a 10" mirror. The Clip-On Towing Mirror is not position specific, so it can accommodate the driver side or the passenger side of your vehicle. Installation is simple and no tools are required. The Clip-On Towing Mirror is perfect for temporary or light towing needs. It is not recommended to be used as a full time heavy-duty towing solution. For best results, remove the towing mirror when not in use, and store in a cool dry place. Expand your Horizons.

◀ DUAL VIEW CLIP ON TOWING MIRROR

The Dual-view Clip-On Towing Mirror provides better towing vision than any towing mirror out there! This innovative product features two fully adjustable mirror surfaces that allow you to fully customize your viewing area. The Dual-view Clip-on's large, flat mirror surface gives an accurate perspective of what is behind you, while the smaller convex surface acts as a built-in spot mirror for increased safety while driving, passing or changing lanes. Plus the fully enclosed mirror head design not only reduces wind vibration, but also ensures that the Dual-View's adjustable mirror surfaces stay right where you put them. This universal mirror features two adjustable arms and rubber straps that will not obstruct your existing mirror. Fits most 7" to 10" mirrors. Expand your Horizons.

UNIVERSAL TOWING MIRROR ▶

CIPA's Universal Towing Mirror is the mirror that you have been looking for! This member of CIPA's towing line is designed to fit the majority of vehicles, and reduce vibration, while maintaining a clean aerodynamic look on your existing mirror. This towing mirror is sure to surpass your expectations in all situations! The Universal Towing Mirror will provide enhanced safety while towing by extending your vision by a full 5 inches. This mirror features a 5 inch by 4.5 inch mirror face, and will not obstruct the view from your original factory mirror. The moveable feet, sturdy clamps, and tightening knob give you a secure fit without annoying vibration. This mirror's aerodynamic styling compliments virtually any vehicle. The Universal Towing Mirror accommodates the driver side or passenger side of your vehicle. Expand your Horizons.

RATCHETING TIE DOWN WITH WEB CLAMP

Erickson's WEB CLAMP was designed to address the problem of what to do with excess webbing. The WEB CLAMP mechanism is much like a mouse trap, lift the spring loaded clamp and place the folded webbing under the clamp, release the spring loaded WEB CLAMP and you have trapped the excess web. Very simple and effective. SO NEAT!!

HOUR AND TACH METERS

PROX HOUR METERS PROGRAM

ProX offers 3 different types of hour meters, with different features and price categories. Motorcycle engines have strict maintenance schedules that must be followed to honor the service life of components and secure reliability of the engine. Knowing what to service and when, is key to a successful preventative maintenance program for your motorcycle, ATV, PWC, boat or snowmobile. All meters are surface mounted meters, which provide what today's Powersports user needs and expect from hour/tach meters. Hour/Tach meters have become the most cost effective method of performing service.

WIRELESS HOUR METER

ProX also offers a state of art Wireless Hour Meter! Unique by eliminating wires the ProX Wireless Hour Meter is a surface mounted vibration activated hour meter, which provides what today's Powersports user needs and expect from hour meters.

Installation is easy without needing to install a wire. Solid state electronics, modern LCD, superb environmental durability and enhanced functionality offer the best of all possibilities without sacrifice to performance, operation or budget.

The wireless hour meter display can be read at all times, with engine off or on. The encapsulate epoxy case is water resistant and shock proof.

With the ProX Wireless Hour Meter you can measure your hours for hours!

ProX Wireless Hour Meter Features:

- Easy installation, no battery and wiring required
- Sensitivity can be set to high or low
- Partial hours can be reset to zero
- Works on all 2/4 stroke gasoline engines
- 100% epoxy encapsulated casing is water resistant and shock-proof
- Automatic roll over
- Records and displays to 99999 hours
- Stand-by time up to over 45.000 hours

ProX Hour Meter	43.HM001	115930	43.56

WIRED HOUR/TACH METER

Hour/Tach meters have become the most cost effective method of performing service. ProX Racing Parts offer two different meters: The Hour Meter, which shows the hours the engine has ran and the Hour/Tach meter that displays the engine running hours and RPM as well when the engine is running. When the engine is off the meter shows total hours accumulated. Both meters' display can be read at all times, with engine off or on. There is no clicking like mechanical meters. Also the encapsulate epoxy case is water resistant and shock proof.

- Installation is easy with the simple (patented) one wire hook-up
- Solid state electronics, modern LCD, superb environmental durability and enhanced functionality offer the best of all possibilities without sacrifice to performance, operation or budget

REMOVES WATER FROM FUEL

The Fuel Filter Funnel by Mr. Funnel is a heavy-duty, anti-static, and fast flow funnel with built-in filter technology. When fuel is poured through the Fuel Filter Funnel, water and debris will not pass through the filter's fluoropolymer-coated stainless steel filter. Only filtered fuel flows through to your engine, improving its efficiency, durability, and proper operation. The sump area collects the deflected water and debris for proper disposal. The Fuel Filter Funnel by Mr. Funnel will filter gasoline, diesel, heating oil, kerosene and 2-cycle mixed gas.

Flexible Spout Extension
for use with 232001 funnel only

CALIFORNIA COMPLIANCE

Due to restrictions on the sale of containers in California, Automatic Distributors has updated part numbers for VP Racing containers. The products will remain the same, apart from different verbiage on the bottom of the cans. There is no change for the caps, vents or hoses. These new Cali part numbers can be sold everywhere and are no-longer considered restricted in the state of California. The chart below indicates the old part numbers on the left, and the new numbers to the right which are under the CALI column.

VP BREAST CANCER AWARENESS

* For each pink container sold, a percentage of the proceeds will be donated by VP Racing Fuels to support the cancer prevention research, education and community outreach programs of the Prevent Cancer Foundation. The VP Breast Cancer Awareness Motorsport Containers carry a 3-year limited warranty against cracks, leaks or splitting. Hoses not included.

NOTE: The VP Breast Cancer Awareness Motorsport Container is intended only for use as a rapid refueling device for racing vehicles used in professional off road and closed course competition racing events. It is NOT a portable fuel container as described by ASTM, EPA, ARB or other state or federal agencies. Intended for racing fuel only; not to be used for street legal fuels.

HIGH VOLUME FLUID DISPENSING WITH COMPLETE CONTROL

The Trigger is designed to allow variable fluid delivery over 3 gallons per minutes. Once the Trigger is installed on your utility jug the days of spilling on your expensive graphics or machine will be over. Because the Trigger is self-venting, you will no longer need to open a separate vent on your utility jug to increase your fluid flow. Leave your vent closed. Simply press the Trigger button and fluid flow. Your desired rate of flow will be determined by how far you press the button. Once you have reached your desired fill level, release the button and fluid flow will stop. The result is a clean, completely controlled delivery of fluid.

GRUNGE BRUSH™

Chain and gear cleaning has never been faster or easier! Scrub the chain with the horseshoe shaped bristles at one end of The Grunge Brush™ to clean all four sides of the chain. Use the long bristles on the other end of the brush to clean components like sprockets, derailleurs, cranksets, brakes and pedals.

Regular component cleaning prevents premature wear and tear on chain and sprockets, eliminates chain skipping caused by dirt and grunge, and assures smooth operation of drivetrain and brakes.

The Grunge Brush™ can be used dry or for deep cleaning action, use it with Citrus Bike Chain Degreaser or Multi Bike Degreaser, by simply spraying degreaser onto the chain or directly onto bristles. Grunge Brush™ scrubbing action, coupled with a Finish Line bike degreaser, will leave your drivetrain looking like new

IMPORTANT NOTICE After installing Ride-On TPS Motorcycle Formula sealant into your tires you may notice a slight vibration until the sealant has warmed up and distributed evenly in your tires. This process usually takes 2 to 5 miles. Please DO NOT attempt to rebalance tires after the installation of Ride-On TPS Motorcycle Formula. Ride-On TPS is a balancing compound. Ride-On TPS will act as a balancer and will result in erroneous readings from a dynamic spin balancer that does not compensate for tire deflection, weight of the bike, brakes, or other suspension components. Ride-On is TPMS friendly, however it is not recommended for use in 2009, 2010, and 2012 Honda Gold Wings as their TPMS Sensors are not hermetically sealed.

BALANCE With one installation of Ride-On, lead weights become a thing of the past. While Ride-On works in conjunction with traditional weights, you won't need them anymore. Ride-On is specially formulated to hydrodynamically balance high-speed tires and dampen road noise and vibrations that cause a rough ride. The great thing is Ride-On will continue to adjust and literally rebalance your tires as you ride for the legal life of the tires. So go ahead, pop off those wheel weights, shine your wheels, and enjoy the smoothest ride you have ever experienced on your bike.

SAFETY FIRST With Ride-On TPS tire sealant, your tire literally fixes itself! If your tire is punctured, the centrifugal force of the rotating tire and the internal air pressure force Ride-On into the hole, sealing it virtually instantly. Since it helps eliminate porosity leaks that cause tires to deflate over time, your tires stay properly inflated, last longer, your bike handles better and gets more miles per gallon.

WORKS IN TUBE AND TUBELESS TIRES Ride-On TPS eliminates 85-95% of flats in tubeless tires from objects up to 1/4" (1/8" for tube tires) that penetrate the contact patch of the tire. Since puncturing objects often tear tubes, Ride-On's efficiency in tube tires is reduced to 55-65%. If the puncturing object remains in the tire, it is vital to remove it as soon as possible to prevent further injury to the tire or tube. Our company takes the position that any repair in a motorcycle tire should be treated as temporary.

RIDE-ON LED SMART CAPS

DESCRIPTION	PART #	
LED SMART CAPS		
LED Smart Cap Small Display w/Wired Cap	650278	33.95

The LED Smart Cap Tire Pressure Monitor (TPMS) valve cap is a must for people that want to make sure that their tires are properly inflated. Once installed the LED Smart Cap TPMS valve cap will alert you if the tire pressure drops by a setpoint pressure. The Light Vehicle version of the Smart Cap Tire Pressure Monitor system is available for automobiles, SUVs, light trucks, vans, motorcycles, scooters, trailers, ATVs, etc. with a pressure range of 10 to 70 psi and a low pressure warning trigger of 4 psi (with a +/- 10% accuracy).

- Easy to Install - Simply screw valve caps onto tire valve stems.
- Bright blinking LED light that is visible in daylight and night time
- Self-Calibrating - Automatically calibrates to pressure the tire was set at when the cap was installed. The same valve can be used with tires from 10 psi to 70 psi (Auto and Motorcycle Version with a 4 psi pressure drop alarm) or 30 to 170 psi for commercial version (available in 4 psi or 8 psi pressure drop alarm)
- Automatically compensates for ambient temperature changes to avoid false alarms.
- Comes with integrated anti-theft device.
- Long lasting low pressure alert - blinking red light alerts of low pressure for 750 hours (more than a month).
- Low battery alarm - the led valve cap will blink yellow for up to 100 hours to alert you that the batteries are running low.
- Long Lasting 3 year battery shelf life.
- Great compliment to Ride-On TPS filled tires - 100% compatible and now you can be alerted of a slow leak.
- Proper tire inflation pressure helps extend tire life.
- Proper tire inflation pressure helps optimize fuel economy and save up to 3% in fuel.
- Available in 2 and 4 pack blister Packaging, as well individual and bulk packaging.

- Forms an "Active" ultra thin, clear film that kills existing corrosion cells, and will protect your quad or bike against new corrosion forming and last for 12 months.
- "ACTIVE" which means that it 'creeps' and 'keeps on working' DOESN'T NEED REAPPLYING AFTER EVERY WASH!
- Contains no water, silicon, teflon or wax - no sticky build up, no risk of existing corrosion being sealed in and no risk of water remaining where it will cause corrosion and damage, even on electronics
- Chemically neutralizes road salt
- A clean, clear ultra thin fluid
- Dries out moisture
- Safe on all components; electronics, chrome, paint and plastic
- Use on heads, cooling fans, throttle linkages, brake cables, battery terminals, voltage regulator, suspension, engine components, torsion bars, fuel control units, fuse box, swingarm, relays / connectors, undercarriage, chain, ignition switch, security systems / FOBs and more!
- ACF-50 can be sprayed on, wiped on with a rag, or professionally fogged for complete protection

Prevention is better than replacement!

Corrosion Block is a unique product that has the ability to both prevent and stop corrosion in more places on Powersports Equipment than any other product of its type.

Corrosion Block is superior anti-corrosion compound. It kills corrosion in progress, prevents new corrosion cells from forming for 12-18 months, is an excellent penetrant and is an excellent light lubricant.

CORROSION BLOCK AEROSOL

Kills Corrosion on Contact!

Protects metal and electronics during play and storage • Chemically neutralizes salt water • A clean, clear ultra-thin fluid which leaves a non greasy atmospheric barrier to protect all metal surfaces • Leaves no gummy residue because it does not contain wax, resin, tar, asphalt, silicone or Teflon • Can be sprayed, brushed or wiped on • Hydrophobic film provides corrosion protection all season • Protects metal components down to -70° • Keeps ice and mud from sticking • Combined with its excellent penetrating and strong dielectric properties (40Kv), have brought electronics "back from the dead" • Removes moisture from the corrosion by-product and isolates it from contacting the metal surface, restoring continuity to electrical circuits • Can be used in many different electrical and electronic applications without fear of damaging the conformal coatings used • Does not harm plastics or painted surfaces • Improves reliability, reduces repair and labor cost.

CORROSION BLOCK WATERPROOF GREASE

Out performs lithium and most synthetic greases and meets or exceeds requirements for NGLI Service Classifications GC-LB (automotive wheel bearing and chassis lubricants) conforming to ATM D4950 performance requirements • Excellent extreme pressure properties • Excellent thermal / oxidative stability • Resists bleeding / melting at high temperatures • Suitable for sealed for life applications • Dielectric / non-conductive • Workplace safe and environmentally friendly • Out performs competitive grease 5:1 • Waterproof.
