## ALSO AVAILABLE

The award winning Tallon™ Accessory System is a universal mounting system with a wide range of fully removable and interchangeable powered and non-powered accessories.

Transshield is a heat shrinkable reusable storage cover which is faster to apply than conventional shrink film. The patented fabric removes water vapour keeping the boat dry and mould free.

Anode Eye is fitted into the hull behind an anode with a hole drilled into the back surface. As the anode erodes and exposes the hole, ambient light passes through and the indicator in the Anode Eye turns **green**, advising that the anode has worn past its most effective state.

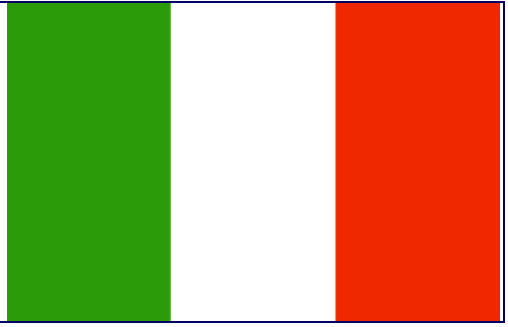

Fenderquip covers are specially designed to protect the topsides from fender scuff. They are manufactured from stain resistant, non-abrasive, durable, fade resistant acrylic fabric available in a range of popular sizes and colours.
